# WE LOVE SCIENCE

## Principles

### At Baines' Endowed, Science is good when....

- We are encouraged to be curious and act like 'real' scientists
- We question, predict, test, solve, investigate, discover and discuss
- We explore the 'real' world, explore 'real' life issues and see 'real' science in our local area
- We carry out investigations and observe over time
- We work together when learning new things
- We are outdoors
- We learn about and meet real scientists
- We learn new vocabulary
- We are challenged
- When it is hands on, exciting, fun, noisy, messy and meaningful
- We are empowered to lead

## VISION

$E=mc^2$

### 'For with God, Nothing is Impossible'

**Our vision is to prepare all children for the 'real world' through high quality teaching and learning. Achieved by creating excitement and wonder through discovery, investigations and real life experiences, linking science to the 'real world'. By removing the image of the 'stereotypical scientist' ALL children will be equipped to have the confidence and aspirations to pursue a 'science' based career.**
