God's Green Guardians

'Agents for Change'

Issue 1: October 2026

"Live in agreement with one another. Do not be proud but ready to mix with everyone. Do not think of yourself better than others." Romans 12:16

Stewardship: Humans are entrusted to manage and protect nature responsibly.

Respect: Because the earth belongs to God, damaging it disrespects the Creator.

Meet Your God's Green Guardians: Ready to Shake Things Up!

Hey everyone! Welcome to the very first God's Green Guardians update. We are officially on a mission to turn our school into a cleaner, greener, and much more sustainable place—and we can't wait to bring you all along for the ride!

First things first, let's introduce our Guardians: Why I wanted to be an 'Agent for Change'

My name is Reece, I am in Year 5. I wanted to be an 'Agent for Change' as I like being outside and I want to help nature as it makes me happy.

Hi, I'm Maisie and I am in Year 5. I really hope I can make a change for everyone. I think I can be a good 'Agent for Change' because I have realised the reason I have been chosen is because I am reliable to trust. If I was to choose between being rich or saving the world, I'd pick saving the world and protecting nature and wildlife.

Hi, my name is Oliver, I am in Year 6. I wanted to be an 'Agent for Change' because I care about the environment and I want to try and make a change.One of my ideas is to organise a litter pick so our school doesn't look untidy and look after animals and wildlife.

Hello, my name is Evelyn. I am in Year 5 and I like taking my two dogs out whilst listening to the crickets and I also build a lot of bug hotels. I really wanted to be a God's Green Guardian because I enjoy nature and want others to as well. Some of my ideas are to do posters and litter picking and turning off light monitors.

Hello, my name is Paul and I am in Year 3. I enjoy gardening. I enjoy being outside to look after nature. Some of my ideas are; electricity monitors and a school trip to a nature reserve or a recycling centre.

Hi, my name is Flynn and I am in Year 5. I think I will be a good God's Green Guardian because I love nature and animals. I love growing plants and I have animals at home.

Hi, I am Matilda, I'm in Year 5. I'm happy and excited because I want to make a change. I love nature and I am hoping I can help make a change. We could start with litter picking.

Hi, I am Evie and I am in Year 3. I think I will be a good guardian because I can look after the plants. Animals and humans need plants to make food.

Hello I am Ellie and I am in Year 2. I am looking forward to being a God's Green Guardian because the world is important. We need to look after it.

Hi, my name is Kenzie and I am Year 4. I love to take care of animals because they are important to the environment and the world. We can make sure our environment is safe and clean.

God's Green Guardian: Adult Leader - Hi I am Miss Britchford. I've always loved being outdoors, whether that's exploring nature, learning about wildlife, or just enjoying fresh air walking my dog, Cooper. But seeing how much waste we produce every day made me realise that sitting back and doing nothing just isn't an option anymore. I truly believe our small daily actions can create a massive splash. We don't just want to talk about protecting the planet; we want to take real action right here on our school grounds!

God's Green Guardian: Adult Leader - Hi, I am Mrs Butterfield. I have grown up in the Fens and have always been surrounded by nature and wildlife. To me, relaxation is being outdoors, whether this is in the woodland, at the beach or just having a walk. I believe children benefit greatly from being outdoors too and gain invaluable life skills. Therefore, I believe protecting the natural world and our wildlife is of utmost importance and whilst we may be a small setting, we can make a big change in our school, local area and beyond.

Wild Ideas for the Year Ahead

To kick things off, here are a few ideas we're itching to get started on:

- Litter clean up to keep and school and community looking beautiful and safe for wildlife
- Electricity monitors
- A recycling revolution
- Wondrous water, thinking about how we can save water
- Transforming unused outdoor corners into mini-wildflower havens to bring back bees, butterflies, and local wildlife.
- Visits to nature reserves or recycling centres
- Swap shops for books, uniforms, and toys so we reuse more and buy less.

We have a whole year of exciting projects ahead, and we're going to need *your* energy to make them happen. Got an eco-idea of your own? Come find us—let's make some green magic happen together.
