Day 4 Sheet 13

Look at the different farm problems that we have come across in some of the stories that we have read. We have added some extra ones to help you as well.

Problem	Resolution
A fox is threatening the hens. As a result, they won't come out of the coop and they've stopped laying eggs!	Put cameras around the chicken coop.
It's too wet! It has rained for a month and the pond has flooded.	Put the animals in a safe place and add new drains at the farm.
There is a storm in the night. One of the fence panels has blown down and the pigs/sheep/cows escape.	Fix the fence and get wood from Harry Byldon's
An animal keeps doing strange things e.g. a pig thinking it's a sheep dog and barking	Call out the vet or try and put the pig with the other pigs?

Can you create your own 'problem' that might happen at the farm? Draw a picture of your problem and write a sentence to explain what is happening. Also think about how it might be solved.

Problem	Resolution
