<b><u>Half term 1</u></b>	<b><u>Half term 2</u></b>	<b><u>Half term 3</u></b>	<b><u>Half term 4</u></b>	<b><u>Half term 5</u></b>	<b><u>Half term 6</u></b>
<p><b><u>Ecosystems</u></b> <b>Ecosystems exist at a range of scales and involve the interaction between biotic and abiotic components.</b></p> <p>An <b>example</b> of a small scale UK ecosystem to illustrate the concept of interrelationships within a natural system, an understanding of producers, consumers, decomposers, food chain, food web and nutrient cycling.</p> <p>The balance between components. The impact on the ecosystem of changing one component.</p> <p>An overview of the distribution and characteristics of large scale natural global ecosystems.</p> <p><b>Tropical rainforest ecosystems have a range of distinctive characteristics.</b></p> <p>The physical characteristics of a tropical rainforest.</p> <p>The interdependence of climate, water, soils, plants, animals and people.</p> <p>How plants and animals adapt to the physical conditions.</p> <p>Issues related to biodiversity.</p> <p><b>Deforestation has economic and environmental impacts.</b></p>	<p><b><u>Natural Hazards</u></b> <b>Natural hazards pose major risks to people and property.</b></p> <p>Definition of a natural hazard.</p> <p>Types of natural hazard.</p> <p>Factors affecting hazard risk.</p> <p><b><u>Tectonic Hazards</u></b> <b>Earthquakes and volcanic eruptions are the result of physical processes. Plate tectonics theory.</b></p> <p>Global distribution of earthquakes and volcanic eruptions and their relationship to plate margins.</p> <p>Physical processes taking place at different types of plate margin (constructive, destructive and conservative) that lead to earthquakes and volcanic activity.</p> <p><b>The effects of, and responses to, a tectonic hazard vary between areas of contrasting levels of wealth.</b></p> <p>Primary and secondary effects of a tectonic hazard.</p>	<p><b><u>Cold Environments</u></b> <b>Cold environments (polar and tundra) have a range of distinctive characteristics.</b></p> <p>The physical characteristics of a cold environment.</p> <p>The interdependence of climate, permafrost, soils, plants, animals and people.</p> <p>How plants and animals adapt to the physical conditions.</p> <p>Issues related to biodiversity.</p> <p><b>Development of cold environments creates opportunities and challenges.</b></p> <p>A case study of a cold environment to illustrate:</p> <ul style="list-style-type: none"><li>• Development opportunities in cold environments: mineral extraction, energy, fishing and tourism</li><li>• challenges of developing cold environments: extreme temperature, inaccessibility, provision of buildings and infrastructure.</li></ul> <p><b>Cold environments are at risk from economic development.</b></p>	<p><b><u>Glacial landscapes</u></b> <b>The UK has a range of diverse landscapes.</b></p> <p>An overview of the location of major upland/lowland areas and river systems.</p> <p>Glacial landscapes in the UK Ice was a powerful force in shaping the physical landscape of the UK.</p> <p>Maximum extent of ice cover across the UK during the last ice age.</p> <p>Glacial processes:</p> <ul style="list-style-type: none"><li>• freeze-thaw weathering</li><li>• erosion – abrasion and plucking</li><li>• movement and transportation – rotational slip and bulldozing</li><li>• deposition – why glaciers deposit sediment (till and outwash).</li></ul> <p><b>Distinctive glacial landforms result from different physical processes.</b></p> <p>Characteristics and formation of landforms resulting from erosion – corries, arêtes, pyramidal peaks, truncated spurs,</p>	<p><b><u>River landscapes in the UK</u></b> <b>The shape of river valleys changes as rivers flow downstream.</b></p> <p>The long profile and changing cross profile of a river and its valley.</p> <p>Fluvial processes:</p> <ul style="list-style-type: none"><li>• erosion – hydraulic action, abrasion, attrition, solution, vertical and lateral erosion</li><li>• transportation – traction, saltation, suspension and solution</li><li>• deposition – why rivers deposit sediment.</li></ul> <p><b>Distinctive fluvial landforms result from different physical processes.</b></p> <p>Characteristics and formation of landforms resulting from erosion – interlocking spurs, waterfalls and gorges.</p> <p>Characteristics and formation of landforms resulting from erosion and deposition – meanders and ox-bow lakes.</p> <p>Characteristics and formation of landforms</p>	<p><b><u>Weather Hazards</u></b> <b>Global atmospheric circulation helps to determine patterns of weather and climate.</b></p> <p>General atmospheric circulation model: pressure belts and surface winds.</p> <p><b>Tropical storms (hurricanes, cyclones, typhoons) develop as a result of particular physical conditions.</b></p> <p>Global distribution of tropical storms (hurricanes, cyclones, typhoons).</p> <p>An understanding of the relationship between tropical storms and general atmospheric circulation.</p> <p>Causes of tropical storms and the sequence of their formation and development.</p> <p>The structure and features of a tropical storm.</p> <p>How climate change might affect the distribution, frequency and intensity of tropical storms.</p> <p><b>Tropical storms have significant effects on people and the environment.</b></p>

<p>Changing rates of deforestation.</p> <p>A <b>case study</b> of a tropical rainforest to illustrate:</p> <ul style="list-style-type: none"> <li>causes of deforestation – subsistence and commercial farming, logging, road building, mineral extraction, energy development, settlement, population growth</li> <li>impacts of deforestation – economic development, soil erosion, contribution to climate change.</li> </ul> <p><b>Tropical rainforests need to be managed to be sustainable.</b></p> <p>Value of tropical rainforests to people and the environment.</p> <p>Strategies used to manage the rainforest sustainably – selective logging and replanting, conservation and education, ecotourism and international agreements about the use of tropical hardwoods, debt reduction.</p>	<p>Immediate and long-term responses to a tectonic hazard.</p> <p>Use <b>named examples</b> to show how the effects and responses to a tectonic hazard vary between two areas of contrasting levels of wealth.</p> <p><b>Management can reduce the effects of a tectonic hazard.</b></p> <p>Reasons why people continue to live in areas at risk from a tectonic hazard.</p> <p>How monitoring, prediction, protection and planning can reduce the risks from a tectonic hazard.</p>	<p>The value of cold environments as wilderness areas and why these fragile environments should be protected.</p> <p>Strategies used to balance the needs of economic development and conservation in cold environments – use of technology, role of governments, international agreements and conservation groups.</p>	<p>glacial troughs, ribbon lakes and hanging valleys.</p> <p>Characteristics and formation of landforms resulting from transportation and deposition – erratics, drumlins, types of moraine.</p> <p>An <b>example</b> of an upland area in the UK affected by glaciation to identify its major landforms of erosion and deposition.</p> <p><b>Glaciated upland areas provide opportunities for different economic activities, and management strategies can be used to reduce land use conflicts.</b></p> <p>An overview of economic activities in glaciated upland areas – tourism, farming, forestry and quarrying.</p> <p>Conflicts between different land uses, and between development and conservation.</p> <p>An <b>example</b> of a glaciated upland area in the UK used for tourism to show:</p> <ul style="list-style-type: none"> <li>the attractions for tourists</li> <li>social, economic and environmental impacts of tourism</li> <li>strategies used to manage the impact of tourism.</li> </ul>	<p>resulting from deposition – levées, flood plains and estuaries.</p> <p>An <b>example</b> of a river valley in the UK to identify its major landforms of erosion and deposition.</p> <p><b>Different management strategies can be used to protect river landscapes from the effects of flooding.</b></p> <p>How physical and human factors affect the flood risk – precipitation, geology, relief and land use.</p> <p>The use of hydrographs to show the relationship between precipitation and discharge.</p> <p>The costs and benefits of the following management strategies:</p> <ul style="list-style-type: none"> <li>hard engineering – dams and reservoirs, straightening, embankments, flood relief channels</li> <li>soft engineering – flood warnings and preparation, flood plain zoning, planting trees and river restoration.</li> </ul> <p>An <b>example</b> of a flood management scheme in the UK to show:</p> <ul style="list-style-type: none"> <li>why the scheme was required</li> <li>the management strategy</li> </ul>	<p>Primary and secondary effects of tropical storms.</p> <p>Immediate and long-term responses to tropical storms.</p> <p>Use a <b>named example</b> of a tropical storm to show its effects and responses.</p> <p>How monitoring, prediction, protection and planning can reduce the effects of tropical storms.</p> <p><b>The UK is affected by a number of weather hazards.</b></p> <p>An overview of types of weather hazard experienced in the UK.</p> <p><b>Extreme weather events in the UK have impacts on human activity.</b></p> <p>An <b>example</b> of a recent extreme weather event in the UK to illustrate:</p> <ul style="list-style-type: none"> <li>causes</li> <li>social, economic and environmental impacts</li> <li>how management strategies can reduce risk.</li> </ul> <p>Evidence that weather is becoming more extreme in the UK.</p> <p><b>Climate change</b>  <b>Climate change is the result of natural and human factors, and has a range of effects.</b></p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

- the social, economic and environmental issues.

Evidence for climate change from the beginning of the Quaternary period to the present day.

Possible causes of climate change:

- natural factors – orbital changes, volcanic activity and solar output
- human factors – use of fossil fuels, agriculture and deforestation.

Overview of the effects of climate change on people and the environment.

**Managing climate change involves both mitigation (reducing causes) and adaptation (responding to change).**

Managing climate change:

- mitigation – alternative energy production, carbon capture, planting trees, international agreements
- adaptation – change in agricultural systems, managing water supply, reducing risk from rising sea levels.
