

GEOGRAPHY

YEAR 8

ALDER
Community High School

Autumn 1	What is the development gap?	
	• I know what development is. • I know social and economic measures of development. • I know how wealth is distributed around the world. • I know the causes of uneven development. • I know how gender inequality affects development. • I know how uneven development can lead to migration. • I know how fair trade can close the development gap. • I know the different types of aid.	Key Vocabulary • Indicator • Development • Economic • Social • Gender Inequality • HIC • LIC • NEE
	How to help at home/useful websites Development - KS3 Geography - BBC Bitesize Dollar Street - photos as data to kill country stereotypes	Assessments 1. Mid-topic retrieval test 2. End of unit assessment

What is it like to live in the world's most populated continent?		
Autumn 2/ Spring 1	- I can describe the location of Asia. - I know why Asia is so diverse. - I know the diverse physical geography of Asia. - I know why people rely on the monsoon. - I know how and why Asia's population is changing. - I know how China's government managed population growth. - I know how Russia's government managed population decline. - I know how development varies across Asia. - I know the causes and consequences of rapid urbanisation in Asia's major cities. - I know what life is like in India's megacities. - I know how China became a global superpower. - I know what challenges China faces as a superpower. - I know how Asia will continue to change in the future.	Key Vocabulary - Density - Population - Megacity - Urbanisation - Migration
	How to help at home/useful websites Introduction to China - KS3 Geography - BBC Bitesize Introduction to Russia - KS3 Geography - BBC Bitesize	Assessments - Mid-topic retrieval test - End of unit assessment
Can two degrees destroy our planet?		
Spring 1/ Spring 2	- I know what climate change is. - I can explain the greenhouse effect and know the causes. - I know the evidence for climate change. - I know examples of climate tipping points. - I know the causes and impacts of deforestation in the Amazon. - I know careers linked to climate change. - I know how Arctic ice is shrinking.	Key Vocabulary - Adapt - Mitigate - Greenhouse Effect - Emissions - Climate Change - Deforestation - Tipping point

	- I know how the UK is affected by climate change now and in the future. - I know how climate change can be managed.	Fossil fuel
	How to help at home/useful websites Climate change - KS3 Geography - BBC Bitesize	Assessments - Mid-topic retrieval test - End of unit assessment
Summer	Can two degrees destroy our planet?	
	- I know what climate change is. - I can explain the greenhouse effect and know the causes. - I know the evidence for climate change. - I know examples of climate tipping points. - I know the causes and impacts of deforestation in the Amazon. - I know careers linked to climate change. - I know how Arctic ice is shrinking. - I know how the UK is affected by climate change now and in the future. - I know how climate change can be managed.	Keywords - Greenhouse gasses - Fossil fuels - Climate change - Tipping points - Deforestation - Logging - Carbon sink - Permafrost - Extreme weather
	How to help at home/useful websites Climate change - KS3 Geography - BBC Bitesize	Assessments - Mid-topic retrieval test - End of unit assessment

Summer	How does water shape the land?	
	• To know how water erodes the land. • To know how rivers transport and deposit sediment. • To know how river processes shape the upper course of a river. • To know how river processes shape the lower course of a river. • To know the causes of river flooding. • To know how human activity can increase the risk of river flooding. • To know how GIS can be used to investigate river landscapes. • To know how rivers and coasts are connected by the movement of water and sediment. • To know how coastal erosion creates different landforms. • To know how coastal deposition creates different landforms. • To know how people manage coastal erosion. • To know how people can adapt to the changing risks created by rivers and coasts.	Keywords • Accumulate • Modify • Erosion • Deposition • Transportation • Landform
	How to help at home/useful websites Coastal processes and landforms - BBC Bitesize Explore rivers - BBC Bitesize	Assessments 1. Mid-topic retrieval test 2. End of unit assessment
