Headteacher: Mr R O'Regan BSc (Hons) NPQH

30th November 2020

Dear Parent/Carer

Last week, we were advised by Public Health England that there were two separate confirmed cases of COVID-19 within the school and we had to close the whole year 11 bubble. Since then, we have been working with Tameside Public Health and following national guidance in order to confirm your child's return date.

Owing to the nature of the contacts, you may find that your child's self-isolation period is extended, or the return date may be different to the original message which was sent last week. **Your child will return on either Monday, 7th December or Wednesday, 9th December. You will have been informed of the return date by text.**

In line with the national guidance, we recommend that your child should stay at home and self-isolate up to their date of return. **Your child must not come to school before this date.** Your child will be set a range of curriculum related independent learning tasks which mirror the curriculum in school and will be given links to attend live online lessons. The work will be accessed through Microsoft Teams and students should check their e mails daily. A video showing how to access Microsoft Teams can be found on the [Home Learning page of the school website](#).

Siblings and other household members do not need to self-isolate unless any of you develop Covid 19 symptoms. We are asking you to do this to reduce the further spread of COVID 19 to others in the community.

If your child is well, then they can return to school and their usual activities on their return date. A negative test does not mean that they can return to school earlier. Your child does not need to get a test unless they develop symptoms.

In calculating the self-isolation end date, we have used the official national test and trace guidance under which the date of last contact with the positive case is considered to be day 1 of a 14 day self-isolation period and where day 15 is the day when self-isolation is lifted and your child can return to school, as set out below:

We are aware that this may differ from how you could interpret the online information that is available, but we are advised to use this method by Public Health England as it reflects a recent change to the national calculation methodology.

Other members of your household can continue normal activities provided your child does not develop symptoms within the self-isolation period.

The following is information from the national guidance:

- If you have been informed that your child is a contact of a person who has had a positive test result for Covid-19 medical advice is clear: your child must immediately self-isolate at home for 14 days from the date of their last contact with them. There is no requirement for other members of your household to self-isolate unless anyone in your household starts to develop symptoms.
- Your child must not attend school.

[Link to the national guidance: Covid 19 stay at home guidance for households with possible coronavirus infection.](#)

Symptoms of COVID 19

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness. If your child does develop symptoms, you can seek advice online from [NHS 111](#) or by phoning 111.

What to do if your child develops symptoms of COVID 19

If your child develops Covid-19 symptoms all members of the household should self-isolate. You should arrange for a test for your child [online](#) or by phoning 119. Please contact school if you are having difficulty accessing a test.

How to stop COVID 19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19:

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Further Information

Further information is available at <https://www.nhs.uk/conditions/coronavirus-covid-19/>

We understand that this disruption is far from ideal, but I am sure you appreciate that we have to follow clear procedures in light of a positive case. Together, our actions will be in the best interests for the health and safety of the school and wider community.

Yours sincerely,

R O'Regan
Headteacher
