

What is CPOMS?

**AWARDS 2018
WINNER**

Secure monitoring of child protection, safeguarding and student welfare for schools.

CPOMS is a revolutionary software application for monitoring child protection, safeguarding and welfare issues. Working alongside a school's existing safeguarding processes, **CPOMS** is an intuitive system to help with the management of child protection, behavioural issues, bullying, special educational needs and domestic issues. Using **CPOMS**, schools can ensure that students are safe and fully supported, whilst school staff can focus on teaching and providing support, instead of administration.

 *"All staff should be aware of the early help process, and understand their role in it. This includes identifying emerging problems, liaising with the designated safeguarding lead, sharing information with other professionals to support early identification and assessment". **Keeping Children Safe in Education (September 2016)***

A meeting held, conversation with a child, or a decision to undertake a CAF can all be recorded on the system, in a safe, secure and searchable record. **CPOMS** keeps track of these incidents and allows you to quickly retrieve them – more efficiently and securely than conventional paper-based systems.

CPOMS allows tracking of referrals to external agencies, such as the NHS/CAMHS, Social Care Services and the Police.

Using the incident and action logging functionality of **CPOMS**, you can follow a referral from the initial stage, keep a record of communications (including letters and phone calls) and be alerted if timescales are not being met. **CPOMS** also uses the same action-based functionality to track communication with parents and carers, as well as students themselves. You can also upload multiple files to a single incident, allowing you to easily move your paper-based records onto **CPOMS**.

Using **CPOMS**, you can review and export information about individual students. Use incidents and links to provide an in-depth report of a student's record, identifying trends and highlighting concerns. **CPOMS'** group reporting features provide summary reports for teachers, management reports for governance and OFSTED inspections and statistical breakdowns highlighting concerns about students.

Using **CPOMS**, you can control staff access based on individual students, classes, year groups, categories, or system functionality.

- ⊙ Control access to system functionality, ensuring management functionality is only available to designated members of staff.
- ⊙ Restrict staff members to specific classes or year groups.
- ⊙ Stop staff members viewing or adding incidents to particular categories – for example, allow teachers to add Child Protection incidents but not view the information that already exists.
- ⊙ Setup staff groups to base permissions on, to ensure all teachers can only access certain information.
- ⊙ Track every click a staff member makes on **CPOMS** for improved internal audit.

Secure monitoring of child protection, safeguarding and welfare for schools.

What Schools are saying about us...

- “We simply couldn’t do without CPOMS, it is the glue that pulls everything together!” **Saira Luffman, Principal, Swallow Hill Community College, Leeds**
- “We LOVE CPOMS at Sacred Heart. It is a brilliant system and has streamlined our lines of communication. The thing I love best is that as Head of School I am updated instantly by an alert.” **Paul Madia, Head of School, Sacred Heart Catholic Primary School, Coventry**
- “Sudbourne Primary School has been using CPOMS for quite a few years now, and without exception, everyone here would recommend it wholeheartedly. It is simple to use, but powerful in its impact. Our ability to respond to children and their families’ needs has been enhanced because, quite simply, we all know what we need to know, when we need to know it. Information sharing is effective, unlike a paper and file option. Confidential information can be shared securely when necessary. When we need to share information with other schools/agencies, we have it at our fingertips... It is the best software investment we have made in years. I am more than happy to talk to any schools who are thinking about investing in CPOMS, who want to know more!” **Sophia Henderson, Sudbourne Primary School, Lambeth**
- “Thanks for a fabulous service by the way, CPOMS is the single best thing we have purchased for a very long time and has saved us hours of paperwork and provided brilliant chronologies for complicated cases. I tell everyone about it!” **Judith Harrison, Head Teacher, Fairfield Primary School, Stockton**
- “CPOMS has very quickly become an essential part of our safeguarding practice. We are able to record any concerns quickly, easily and in much more detail. The Designated Safeguarding Leads are able to gain a very clear picture of concerns reported and we can evidence how we have taken appropriate action. I would thoroughly recommend CPOMS to any school looking to ensure that their safeguarding practice is of the highest standard.” **Marcus Roe, Executive Headteacher, Federation of Ampfield & John Keble CofE Primary Schools, Hampshire**
- “We really do not know how we coped without CPOMS. In fact we are so impressed that we have been spreading the word and have already had a few demos within our school for other schools in the area, who I believe have had CPOMS installed or are in the process of this. Hopefully all schools in Slough will sign up for this service and we continue to sing the praises of CPOMS wherever we go. The local Early Help team are so impressed and have referred other schools to us to gain an insight into the system and how we are finding it. I actually have another school coming to see me this week with a view to having CPOMS. So thank you for such a wonderful Child Protection tool.” **Laura McAlpine, Safeguarding and Well Being Officer, St Ethelberts Catholic Primary School, Slough**
