

LAVA LAMP

1. Fill 1/3 of your container with water
2. Add baby oil until you have 3 inches left at the top
3. Drop 10-15 drops of food colouring
4. Add an alkasetzer

The Science Behind It

Oil molecules are only attracted to other oil molecules and water molecules are attracted to water molecules. They don't mix together. The reason the oil floats on top is because the oil is less dense than water.
