November 2024

Dear parents/carers,

As part of our Science curriculum, the children in Year Five and Six have been learning about the Heart and Circulatory System. Within our curriculum, we want to give the children as many opportunities to work scientifically within lessons - this provides them with hands on experiences and the chance to learn practically.

Within one of our final lessons, we are going to further explore the different parts of the heart and how it is made up of four chambers. To do this we are going to lead a heart dissection for the children to watch. This will be led by the child's class teacher and the children will be able watch but not touch. When sourcing the hearts to use we will be mindful of beliefs and values.

If you have any concerns about this please get in contact with your child's class teacher.

Many thanks,

Miss Dibley, Mr Phillips-Alexander & Mr Booth
