5<sup>th</sup> March 2021

Dear Parent / Carer,

The DFE have sent out information regarding adults of school aged children having access to Lateral Flow Covid-19 home test kits. These tests are not to be used on children but parents / carers have the opportunity to test themselves twice weekly. All the staff in school currently access tests and it has proved to be a quick and easy process. The DFE guidance states:

***Asymptomatic testing information for parents and adults in households with children at school or college***

*NHS Test and Trace announced earlier this week, that all adults in households with school and college age children without symptoms can now access regular rapid coronavirus (COVID-19) testing. Test kits can either be collected or ordered online, as set out below. You should not give test kits to parents, carers or household members and should not order more test kits for this purpose. Secondary school and college students will continue to access testing through their school or college.*

*Undertaking regular, rapid coronavirus (COVID-19) testing helps reduce transmission of the virus. Parents and other adults in households with children at school or college, who do not have symptoms, can now access regular, rapid coronavirus (COVID-19) testing. This includes childcare and support bubbles. Tests are fast, easy and completely free. There are different ways for a household, childcare or support bubble to collect their test to take at home, twice-weekly:*

- *through your employer, if they offer testing to employees*
- *by collecting a home test kit from a local test site – anyone aged 18 or over can collect 2 packs of 7 tests*
- *by ordering a home test kit online – please do not order online if you can access testing through other routes, this frees up home delivery for those who need it most*

*Children of primary school age (and below) without symptoms are not being asked to take a test. Testing is voluntary, but strongly recommended to all who are eligible. Alongside the vaccine, washing hands, wearing face coverings, and maintaining social distancing, rapid testing plays a vital role in reducing transmission rates. Getting into the habit of regular testing as part of our everyday lives will help us all to play our part and do what we can to protect each other.*

Thank you for your help and support, and we look forward to welcoming the pupils back on Monday 8<sup>th</sup> March.

Yours sincerely,  
Mr Sharp
