

# PSHE & Careers Parental Questionnaire 22\_23 Results

195 parental responses in total

- Yr 7: 60 responses
- Yr 8: 48 responses
- Yr 9: 32 responses
- Yr 10: 29 responses
- Yr 11: 23 responses

## Year 7 Curriculum 2022-23

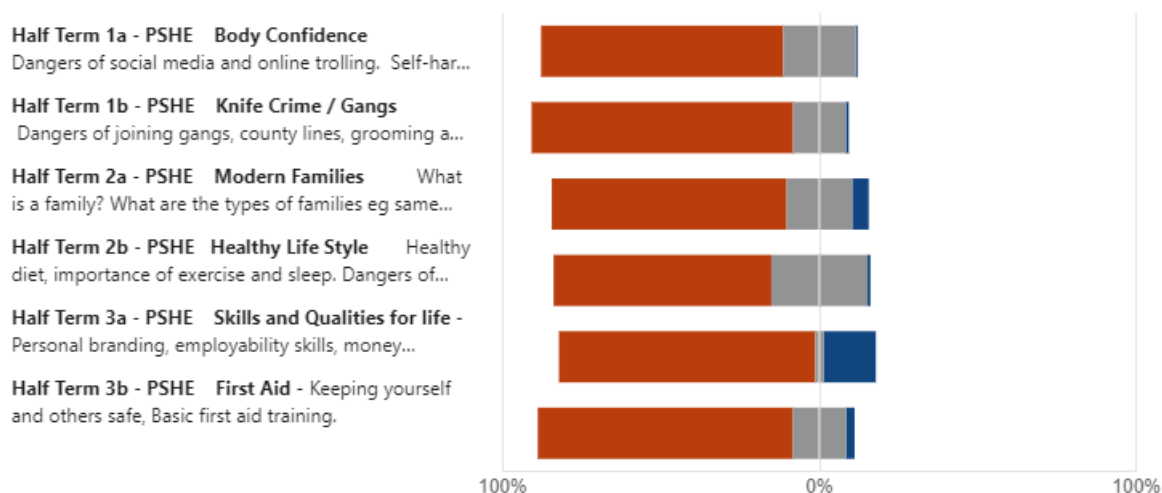

■ Yes, it's in the right place
 ■ No, it's too late
 ■ No, it's too early

- In half term 3a, we focus on employability skills through the study of the importance of charities and helping others. Students participate in planning a charity event – linked to school, such as Docks2Disney. We feel passionate about our students developing their skills from yr 7, until they leave in yr 11.

## Year 8 Curriculum 2022-23

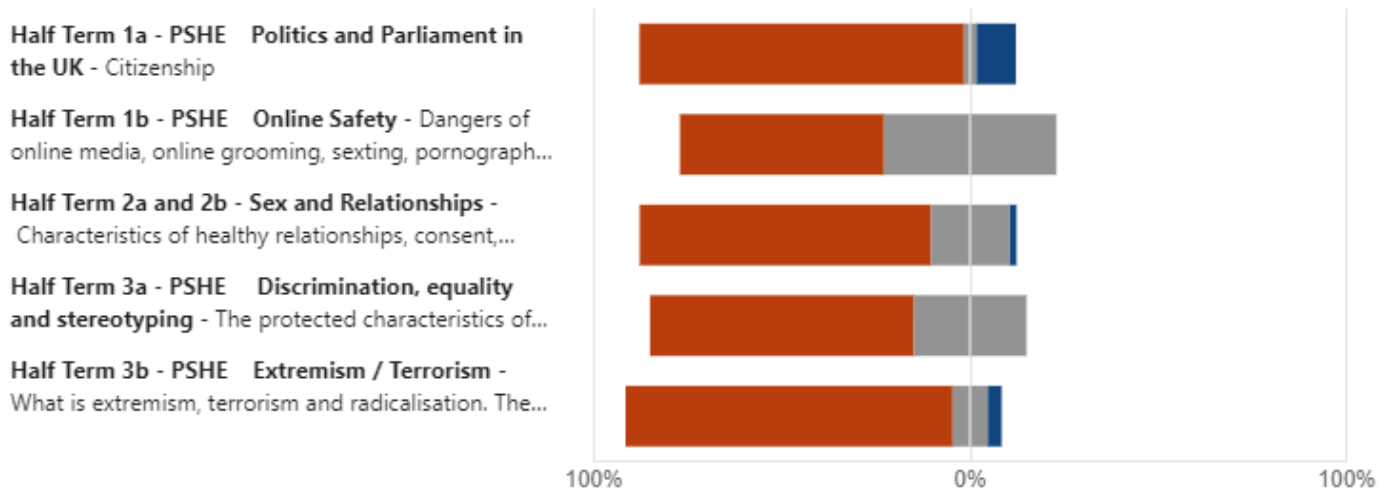

■ Yes, it's in the right place
 ■ No, it's too late
 ■ No, it's too early

- Healthy life styles unit – 30% of parents who responded stated that this was too late. Although in PSHE we cover this topic in term 3a, we teach strands of this topic in year 7 through the unit: Life at ACSC, and students are taught online safety in Yr 7 computing in term 1a. Students also have a lesson of food and nutrition, on a carousel basis, which outlines healthy eating from year 7.
- The Modern families unit is new to our scheme of work and teaches about different family types. It also focuses on discrimination against same sex families, adoption and fostering etc. This builds on content taught in yr 7 term 1a in the unit: No tolerance at ACSC.

### Year 9 Curriculum 2022-23.

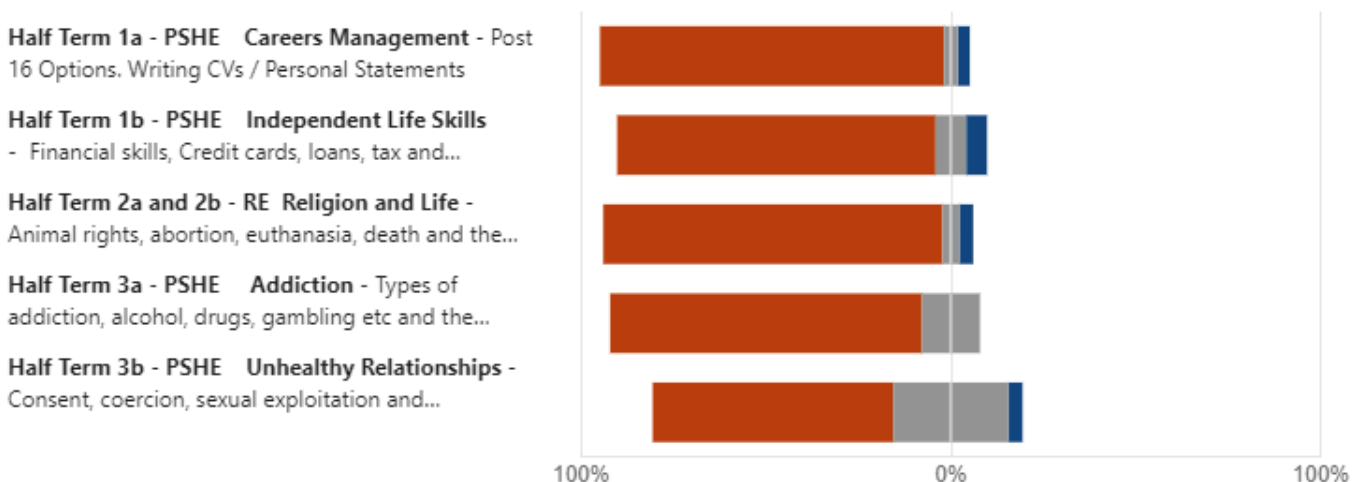

■ Yes, it's in the right place   ■ No, it's too late   ■ No, it's too early

- 45% of parents outlined that online safety was too late to be delivered in yr 9; however, our school understands the importance of online safety and it is covered during the first term at ACSC in computing, rather than PSHE. Therefore, this unit is used to revisit key concepts and build on prior learning.
- 29% of parents suggested that term 3a unit is taught too late. However, this is again a unit built on knowledge already taught in Yr 7 PSHE term 1.

### Year 10 Curriculum 2022-23.

■ Yes, it's in the right place   ■ No, it's too late   ■ No, it's too early

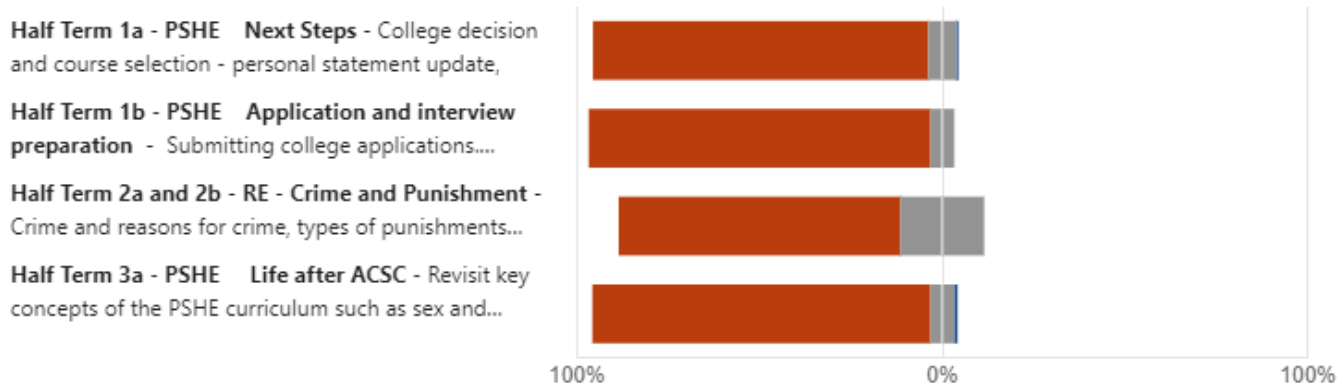

- Addiction is a unit that has been developed to build on looking at the dangers of drugs, alcohol and substance abuse, but also gambling and other forms of addiction. Students are already taught about the dangers of these

substances in yr 7 and some across other curriculum areas e.g. Science. We believe by revisiting these topics and looking at them in more depth, in relation to addiction, provides a greater level of understanding for a more mature student.

- Term 3b focuses on unhealthy relationships in more detail. As a school and throughout PSHE, we look at many types of relationships and the impact negative ones can have. In each year, we discuss relationships that include: friendships, intimate and sexual, peer pressure, coercion and consent. We also have assemblies and form time activities, across all year groups, on consent and coercion, as we know the importance of our students' understanding these concepts.

## Year 11 Curriculum 2022-23.

■ Yes, it's in the right place   ■ No, it's too late   ■ No, it's too early

- During half term 2a and 2b, students look at current and thought-provoking content, that not only links to the PSHE curriculum, but also RE. Throughout PSHE, in KS3 and KS4, we underpin our lessons where relevant, with ensuring students know the laws surrounding each topic and the consequence of breaking those laws.
