What would it be like to live on the Moon?

In the news this week

Nasa officials have recently announced that humans could live on the Moon during this decade. They wouldn't be living there permanently, but could stay for long periods to carry out scientific research. Howard Hu, who leads the Orion lunar spacecraft programme for Nasa, said they would need to create homes on the lunar surface to support scientific expeditions. Nasa's plan is that the next mission would have a crew onboard, followed by a third, where astronauts would land on the Moon. This would be the first manned Moon trip for Nasa since Apollo 17, 50 years ago, in December 1972.

Things to talk about at home ...

- > Share what you know about the Moon and the history of Moon landings. Do you know anyone who remembers that time in history?
- > Share your thoughts on a possible base on the Moon. Do you think it is a good idea?
