In the news this week

In recent weeks, both India and Russia's space agencies have tried to send unmanned missions to the Moon. They were heading to the lunar South Pole, which is a less explored part of the Moon. Whilst Russia's shuttle crashed into the Moon's surface after spinning out of control, India has become the first nation to land near the Moon's South Pole. The mission, named Chandrayaan-3, has been declared a success as the Vikram lander touched down at the end of August. The lunar South Pole is covered by shadow and largely unknown.

Things to talk about at home ...

- > Share your thoughts on the recent competition for countries to reach the Moon's South Pole.
- > Is space exploration something that interests you? What do you think we can learn from exploring space?

Please note any interesting thoughts or comments
