Year 11 Homework Timetable

YEAR 11 FOCUS:

Apply and analyse

Apply what you know to exam questions with confidence, and keep revisiting and recalling.

How homework works

3

homeworks a day (2 on Friday): 14 a week

40–60

minutes for each homework

2

a week in English, Maths, Science and each option

$\frac{1}{3}$

of your learning should happen at home

Where to find your homework

On the lesson slides

Your teacher shows every homework in class.

On Google Classroom

Posted on the same day it is set.

In your planner

Write it down every time. Your teacher will check.

How to do it

Handwrite it in your exercise book (except Seneca). Sparx Maths working goes in your maths homework book.

Spend 40–60 minutes on each homework and hand in your best work.

Do your exam questions every week, in every subject, and learn from the feedback.

For parents and carers

Each homework should take 40 minutes to an hour, so 2–3 hours on most evenings, plus revision. At least a third of your child's learning should now take place at home. Every task is in the planner and on Google Classroom. Help your child plan revision around their mock examinations, and protect time for it each week. Questions about a task? Please contact the subject teacher.

1
3

At least a third of your learning happens at home

The homework on the timetable is the minimum. Add your own revision every week:

Test yourself

Flashcards, quizzes, or write down everything you remember, then check.

Revisit

Go back to older topics every week, not just the one you are on now.

Practise

Answer past-paper questions, building up to full papers under timed conditions.

Use feedback

Fix your mistakes and redo the questions you found hard.

What kind of homework will I get?

BEFORE A NEW TOPIC

Pre-learning to get you ready

EACH TOPIC

One longer text to read, with questions

EVERY WEEK

Written homework and exam questions in every subject

TESTS

Revision before, feedforward after, both with written answers

Every homework is a clear task: never just 'revise' or 'research', and never finishing off classwork unless your teacher has planned it that way.
