Here are the latest updates from our eco-council!

### New Eco-Warrior Award

The eco-warrior award will be awarded to one child per term, for contributing to our eco aims and going above and beyond to take care of our community, environment and planet! Congratulations to Lola in 4TS who has gained the status of eco-warrior in the Autumn term for helping her family with recycling, walking to school, planting flowers and donating her old things. If you would like to apply, see Miss. Fifer or Mrs. Spedding for an application form!

### Eco Club

The children that have attended eco club this term have been very busy helping the wildlife in our community. We have made some home-made bird feeders, which we have donated to some of our local care homes. If you would like to have a go at making your own bird feeder at home, we have included the instructions below.

### Pine Cone Bird Feeder

#### You will need:

- Pine cone
- Lard
- Birdseed
- String
- Scissors

#### Instructions

1. Find a pine cone from your outdoor area. Prepare a bowl with a teaspoon of lard and smother your pine cone with it. This will be messy!
2. Put your pine cone in the fridge to let the lard get nice and sticky. While you're waiting, put some of your birdseed onto a plate. After 30 minutes, remove your pine cone from the fridge and roll it in the birdseed to cover it.
3. Cut a piece of string about 8 inches long. Ask an adult to help. Tie the string around your cone and hang it on a tree or bush outside. Now watch for the birds!
