

# Badger Class – Spring Term

Our Spring Term topic is all about Africa and just how diverse the continent is! We will be: learning that it is a continent made up of vastly different countries, looking at the difference between poor and rich parts of Africa, comparing our lives with those of different children across the continent and even becoming experts on one country each.

Along the way we will also be looking at our new partner school in Kibera, the place some of our teachers are visiting in January, to see how our school compares with their school.

## English

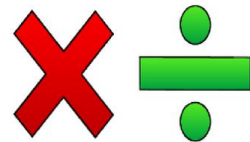

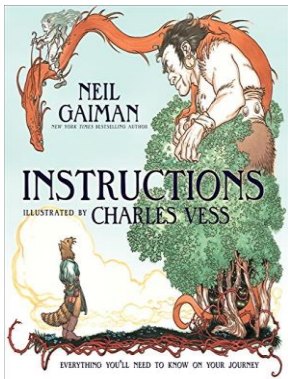

We will be looking at story writing from different perspectives, writing clear instructions, non-chronological reports about animals and descriptive list poetry.

## Maths

This term we will be continuing our practical and pictorial maths, focusing on multiplication and division, before moving onto fractions and the tricky topic of time.

## Science

Our work will be based around animals including humans. We will be looking at how animals grow, what they need to survive and how to stay healthy. We will then link this with our food and where it comes from.

**MULTIPLICATION**  
**DIVISION**
