
Care in the Sun

School Information

As we are approaching warmer weather, we would be grateful if you could read the information below regarding care in the sun whilst your child is in school.

Sun Lotion

When you consider it necessary, please put sun cream on your child before the start of the school day.

Bringing Sun Lotion into School

If you wish your child to apply sun cream throughout the school day, please send a tube of sun lotion into school with your child's name on it. Please ensure that this is handed to the class teacher and not left in your child's bag.

Teachers are not able to apply the sun cream to your child, but on sunny days, they will supervise the children applying their own sun cream before going out for lunch time play.

We have informed the children that we do not want them to share their sun cream with another child. However kind this may seem, we have explained that some children may not be able to wear sun lotion, so the cream is for your child to use only.

Sunhats

On hot days please ensure you send your child with a sun hat to protect their face from the sun. The back of the neck is also a very vulnerable part of the body and sunburn on this part of the body can cause sun stroke. Therefore, if your child has a sunhat with a flap at the back, this would protect this part of the body.

No Thank You to Sunglasses Please

Unless they are prescription sunglasses , we are saying no to sunglasses.

As ever, should you have any questions regarding the above, please do not hesitate to call in and see me.

Many thanks

Mrs Clarey
