

Bearwood Primary and Nursery School

Science Progression of Knowledge

Science context: National Curriculum

A high-quality science education provides the foundations for understanding the world through the specific disciplines of biology, chemistry and physics. Science has changed our lives and is vital to the world's future prosperity, and all pupils should be taught essential aspects of the knowledge, methods, processes and uses of science. Through building up a body of key foundational knowledge and concepts, pupils should be encouraged to recognise the power of rational explanation and develop a sense of excitement and curiosity about natural phenomena. They should be encouraged to understand how science can be used to explain what is occurring, predict how things will behave, and analyse causes.

<u>Plants</u>		To understand plants	To understand plants	To understand plants			
	Children should know						
	about similarities and	Identify and name a	To observe and know	Identify, know and			
	differences in	variety of common	how seeds and bulbs	describe the			
	relation to places,	wild and garden	grow into mature	functions of different			
	objects, materials	plants, including	plants	parts of flowering			
	and living things.	deciduous and		plants: roots,			
		evergreen trees.	To find out and	stem/truck, leaves			
	They talk about the		describe how plants	and flowers			
	features of their own	Identify and describe	need water, light				
	immediate	the basic structure of	and suitable	Explore and know			
	environment and	a variety of common	temperature to grow	the requirements of			
	how environments	flowering plants	and stay healthy	plants for life and			
	might vary from one	(seeds, roots etc),		growth (air, light,			
	another.	including trees.		water, nutrients			
				from soil, and room			
	They make			to grow) and how			
	observations of			they vary from plant			
	animals and plants			to plant			
	and explain why						
	some things occur,			Investigate and			
	and talk about			understand the way			
	changes.			in which water is			
				transported within			
				plants			

Animals and Humans Living Things	To understand animals and humans identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals Identify and name a variety of common animals that are carnivores, herbivores and omnivores describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets) Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.	To understand animals and humans To know that animals, including humans, have offspring which grow into adults To know and describe the basic needs of animals, including humans, for survival (water, food and air) Know and describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.	Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal. To understand animals, including humans To identify and know that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat Identify and know that humans and some animals have skeletons and muscles for support, protection and movement	To understand animals and humans Describe the simple functions of the basic parts of the digestive system in humans. Identify the different types of teeth in humans and their simple functions. Construct and interpret a variety of food chains, identifying producers, predators and prey.	Animals, including humans To describe the changes as humans develop to old age	Animals, including humans identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function describe the ways in which nutrients and water are transported within animals, including humans.
		things		things Identify and name a variety of living	their habitats	<u>habitats</u>

		explore and compare the differences between things that are living, dead, and things that have never been alive identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other identify and name a variety of plants and animals in their habitats, including microhabitats Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of	things (plants and animals) in the local and wider environment. Give reasons for classifying plants and animals based on specific characteristics. Recognise that environments are constantly changing and that this can sometimes pose dangers to specific habitats.	To know and describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird	describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including microorganisms, plants and animals Give reasons for classifying plants and animals based on specific characteristics.
		food.			
Evolution					recognise that living things have changed over time and that fossils provide information about living things that

						inhabited the Earth millions of years ago
						recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents
						Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.
Materials	To investigate	To investigate	Rocks	To investigate	Properties and

		closes a circuit and		
		associate this with		
		whether or not a		

				T	
			lamp lights in a		
			simple series circuit.		
			Recognise some		
			common conductors		
			and insulators and		
			associate metals		
			with being good		
			conductors.		
Earth & Space				Earth and space	
Earth & Space				Laitii and space	
				Describe the	
				movement of the	
				Earth, and other	
				planets, relative to	
				the Sun in the solar	
				system	
				Describe the	
				movement of the	
				Moon relative to the	
				Earth	
				Earth	
				Describe the Sun,	
				Earth and Moon as	
				approximately	
				spherical bodies	
				Spriemear Sources	
				Use the idea of the	
				Earth's rotation to	
				explain day and	
				night, and the	
				apparent movement	
				of the sun across the	
				sky.	
Seasonal	To understand				
Changes	seasonal changes				
Changes					
	Observe and talk				
	Observe and talk				
	about changes				
	across the four				
	seasons				
	Observe and				
	describe weather				
	associated with the				

	seasons and how day length varies, including understanding that it is unsafe to look directly at the Sun.				
Sound			To investigate sound and hearing Identify how sounds are made, associating some of them with something vibrating.		
			Recognise that vibrations from sounds travel through a medium to the ear.		
			Find patterns between pitch of a sound and features of the object that produced it. Find patterns		
			between the volume of a sound and the strength of the vibrations that produced it. Recognise that sounds get fainter as the distance from the		
Forces & Magnets		Forces and magnets	sound's source increases.	Forces and Magnets	
Magnets				explain that unsupported objects fall towards the Earth because of the	

		compare how things move on different surfaces	force of gravity acting between the Earth and the falling object identify the effects	
		forces need contact between 2 objects, but magnetic forces can act at a distance	of air resistance, water resistance and friction, that act between moving surfaces	
		magnets attract or repel each other and attract some materials and not others	recognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater	
		compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials	effect	
		describe magnets as having 2 poles		
		Predict whether 2 magnets will attract or repel each other, depending on which poles are facing.
