### Year 11 – Preparing for BTEC ICT

BTEC ICT is a demanding subject that will have you studying aspects of IT which you are then expected to apply to real world situations. The course naturally builds upon knowledge acquired from GCSE but is also open to those who have not studied the subject at GCSE level.

Some resources to accompany this course can be found here: [tinyurl.com/veb4pyw](https://tinyurl.com/veb4pyw)

Within this folder are resources that have been used this year to teach Unit 1 of the course. Unit 1 is the only paper based exam of the qualification and in short, it wants to apply your knowledge to a number of given scenarios.

#### **Where to start**

It is recommended that the first topic you look at is 'Backing Up Information'. Within the presentation you will find a lot of information regarding the types of backup that exist in the professional world.

#### **Activities**

1. Try to make a mind map of the content covered here.
2. Attempt an answer to the 9-mark question that is also found in the folder – it is titled 'Backing up – Questions from past papers'.
3. Look through the past papers to find any other questions you feel relate to this topic – have a go!

Please feel free to email Mr Ravenscroft any work you complete – he is more than happy to mark it.
