8035/3 Paper 3 Geographical applications

Mark scheme

---

8035

June 2018

---

Version/Stage: 1.0 Final

---

---

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from [aqa.org.uk](http://aqa.org.uk)

## Point marked questions marking instructions

The mark scheme will state the correct answer or a range of possible answers, although these may not be exhaustive. It may indicate how a second mark is awarded for a second point or developed idea. It may give an indication of unacceptable answers. Each mark should be shown by placing a tick where credit is given. The number of ticks must equal the mark awarded. Do not use crosses to indicate answers that are incorrect.

## Level of response marking instructions

Level of response mark schemes are broken down into levels, each of which has a descriptor. The descriptor is linked to the Assessment Objective(s) being addressed. The descriptor for the level shows the average performance for the level.

Before you apply the mark scheme to a student's answer read through the answer and annotate it (as instructed) to show the qualities that are being looked for. You can then apply the mark scheme. You should read the whole answer before awarding marks on levels response questions.

### Step 1 Determine a level

Descriptors for the level indicate the different qualities that might be seen in the student's answer for that level.

When assigning a level you should look at the overall quality of the answer and not look to pick holes in small and specific parts of the answer where the student has not performed quite as well as the rest. If the answer covers different aspects of different levels of the mark scheme you should use a best fit approach for defining the level and then use the variability of the response to help decide the mark within the level, ie if the response is predominantly Level 2 with a small amount of Level 3 material it would be placed in Level 2 but be awarded a mark near the top of the level because of the Level 3 content. For instance, in a 9 mark question with three levels of response, an answer may demonstrate thorough knowledge and understanding (AO1 and AO2) but fail to respond to command words such as assess or evaluate (AO3). The script could still access Level 2 marks. Note that the mark scheme is not progressive in the sense that students don't have to fulfil all the requirements of Level 1 in order to access Level 2.

### Step 2 Determine a mark

Once you have assigned a level you need to decide on the mark. The descriptors on how to allocate marks can help with this. The exemplar materials used during standardisation will also help. There will generally be an answer in the standardising materials which will correspond with each level of the mark scheme. This answer will have been awarded a mark by the Lead Examiner. You can compare the student's answer with the example to determine if it is the same standard, better or worse than the example. You can then use this to allocate a mark for the answer based on the Lead Examiner's mark on the example.

You may well need to read back through the answer as you apply the mark scheme to clarify points and assure yourself that the level and the mark are appropriate.

Indicative content in the mark scheme is provided as a guide for examiners. It is not intended to be exhaustive and you must credit other valid points. Students do not have to cover all of the points mentioned in the indicative content to reach the highest level of the mark scheme.

An answer which contains nothing of relevance to the question must be awarded no marks.

## Assessment of spelling, punctuation, grammar and use of specialist terminology (SPaG)

Accuracy of spelling, punctuation, grammar and the use of specialist terminology will be assessed via the indicated 9 mark questions. In each of these questions, three marks are allocated for SPaG as follows:

- **High performance** – 3 marks
- **Intermediate performance** – 2 marks
- **Threshold performance** – 1 mark

## General guidance

- Mark schemes should be applied positively. Examiners should look for qualities to reward rather than faults to penalise. They are looking to find credit in each response they mark. Unless the mark scheme specifically states, candidates must never lose marks for incorrect answers.
- The full range of marks should be used. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted
- Crossed out work should be marked unless the candidate has replaced it with an alternative response.
- Do NOT add ticks to level-marked questions – use the highlight tool/brackets to signify what is relevant.
- Sometimes there are specific “triggers” in the mark scheme that enable higher level marks to be awarded. For instance, an example or case study may be required for Level 3 if it is stated within the question.
- Where a source, such as a photograph or map, is provided as a stimulus it should be used if requested in the question, but credit can often be given for inferred as well as direct use of the source.
- Always be consistent – accept the guidelines given in the mark scheme and apply them to every script
- If necessary make comments to support the level awarded and to help clarify a decision you have made
- Examiners should revisit standardise script answers as they apply the mark scheme in order to confirm that the level and the mark allocated is appropriate to the response provided.
- Mark all answers written on the examination paper.

## Description of annotations

Annotation	Meaning/Use
?	Unclear
[	Left square bracket
]	Right square bracket
^	Omission mark
AO1	Assessment Objective 1
AO2	Assessment Objective 2
AO3	Assessment Objective 3
L1	Level 1
L2	Level 2
L3	Level 3
DP	Developed point
DEV	Development
EG	Example / reference
EVAL	Evaluation
HLINE	Horizontal Line
JUST	Level or point just awarded
MAX	Max
Vertical Wavy Line	Not relevant
NC	Nothing Creditworthy
NAQ	Not answered the question
REP	Repeat
SEEN	Reviewed but no marks awarded
Tick	Correct point
TV	Too vague
Highlight	Highlight Box
On Page comment	On Page Comment
Off Page Comment	Off page Comment

<ul style="list-style-type: none"> <li>• Level 3 (detailed) use of the resources with a wide range of points developed (using the range of resources or going beyond the resources) which supports the decision. Offers detailed observations which support the decision OR offers a balanced appreciation of the advantages/disadvantages of the proposed development. Likely to use material from different parts of the resource booklet.</li> <li>• Level 2 (clear) use of the resources with a range of points identified with some development in order to support the decision. OR clearly considers advantages/disadvantages of the proposed development. May reference other parts of the resource booklet.</li> <li>• Level 1 (basic) use of the resources with a limited number of individual points identified (largely copied points with limited development) in order to support the decision. OR identifies basic advantages/disadvantages of the proposed development expressed within the resources. May be limited to Figure 3 only.</li> </ul> <p><u>Indicative content</u></p> <ul style="list-style-type: none"> <li>• There is an expectation that candidates will draw on evidence from the whole of the resource booklet in order to consider broader themes and potentially bring in wider aspects of their geographical study.</li> <li>• Decision making implies an element of evaluative thinking. This can be expressed in different ways.</li> <li>• There are strong synoptic links running through the whole exercise including; elements of physical geography; environmental geography; social geography and economic geography.</li> <li>• There is a strong link to the idea of the environment as a valuable resource and an appreciation of the concept of both environmental and socio-economic sustainability and how these might be linked is implicit throughout the exercise.</li> <li>• This exercise implies an understanding of the challenges of managing the security of water supply and the importance of a reliable and cost effective supply of water.</li> <li>• There is a clear reference to the idea that there may be different ways to satisfy increasing demand, so this scheme could be seen relative to other possibilities.</li> <li>• There is a clear element of balancing socio-economic gains and socio-environmental costs, but there are more complex factors, for example, the extent to which the development might create wider gains at the cost of local people.</li> </ul>				

	<ul style="list-style-type: none"> <li>• The nature of the exercise suggests an element of discussion about the balance between managing supply and demand. As such there is a strong element of using conservation and technology to control demand, which in turn may reflect on the need for large scale developments. The proposed development is being sold as essentially the only real option; however opposition groups suggest that there may be other options/combinations of options.</li> <li>• Part of the discussion may be the extent to which the development provides the best opportunity to satisfy future water needs or whether a number of smaller schemes and conservation measures may be more economically and environmentally suitable.</li> <li>• Candidates may challenge the idea that the development is based on future predictions (of population/housing based demand and climate uncertainty) and consider that this data may be unreliable, consequently leading to a “white elephant” scenario (Kielder Water?). This avenue of thinking is reasonable in relation to offering a broad ranging evaluative judgement.</li> </ul> <p>AO3 = 6 marks, AO4 = 3 marks</p> <p><b>Spelling, punctuation and grammar (SPaG)</b></p> <p><b>High performance</b></p> <ul style="list-style-type: none"> <li>• Learners spell and punctuate with consistent accuracy</li> <li>• Learners use rules of grammar with effective control of meaning overall</li> <li>• Learners use a wide range of specialist terms as appropriate</li> </ul> <p><b>Intermediate performance</b></p> <ul style="list-style-type: none"> <li>• Learners spell and punctuate with considerable accuracy</li> <li>• Learners use rules of grammar with general control of meaning overall</li> <li>• Learners use a good range of specialist terms as appropriate</li> </ul> <p><b>Threshold performance</b></p> <ul style="list-style-type: none"> <li>• Learners spell and punctuate with reasonable accuracy</li> <li>• Learners use rules of grammar with some control of meaning and any errors do not significantly hinder meaning overall</li> <li>• Learners use a limited range of specialist terms as appropriate</li> </ul> <p><b>No marks awarded</b></p> <ul style="list-style-type: none"> <li>• The learner writes nothing</li> <li>• The learner’s response does not relate to the question</li> </ul> <p>The learner’s achievement in SPaG does not reach the threshold performance level, for example errors in spelling, punctuation and grammar severely hinder meaning.</p>	<p><b>3</b></p> <p><b>2</b></p> <p><b>1</b></p> <p><b>0</b></p>

**Section B: Fieldwork**

Qu	Pt	Marking guidance	Total marks
04	1	<p><b>Complete the map below (Figure 5) to show the origin of visitors to Bournemouth using the following data.</b></p> <p>1 mark for correct shading in appropriate region (Yorkshire and the Humber). Must be shown as horizontal lines</p> <p>AO4 = 1 mark</p>	1
04	2	<p><b>Describe the pattern shown by Figure 5.</b></p> <p>Two basic points OR one developed point (can be an identified point and use of data)</p> <p>Needs reference to the actual map data to provide accurate indicative content</p> <ul style="list-style-type: none"> <li>• Most come from the southern area (1), particularly the South east, East Midlands and West Midlands (d)(1)</li> <li>• Fewer come from the northern area (1), particularly Scotland, Wales and Northern Ireland (d)(1)</li> <li>• Fewest from Wales / Scotland / Northern Ireland (1)</li> <li>• The greater the distance from Bournemouth the smaller the number of visitors (1)</li> <li>• Higher towards the east of the map (1)</li> </ul> <p>Max 1 mark for lifting data about areas (at least 2) from the key eg 14 % and more came from the South East, and 5% or less came from Scotland (1)</p> <p>Allow reference to Figure 4 data.</p> <p>AO4 = 2 marks</p>	2
04	3(a)	<p><b>Suggest one additional question which could be included on the visitor survey.</b></p> <p>Credit any valid additional idea that would give a more accurate picture of visitors to Bournemouth</p> <p>Questions might relate to:</p> <ul style="list-style-type: none"> <li>• Form of transport used to visit Bournemouth</li> <li>• When the visit took place</li> <li>• Time taken to reach Bournemouth</li> <li>• Reason for visit</li> <li>• Length of stay</li> <li>• Type of accommodation</li> </ul>	1

		<ul style="list-style-type: none"> <li>• Attractions visited.</li> <li>• Whether you would return</li> </ul> <p>No credit for “where have you come from?”</p> <p>AO4 = 1 mark</p>	
04	3(b)	<p><b>Give one reason why your chosen question might provide useful information for the visitor survey.</b></p> <p>Credit any valid reason which is clearly linked to part (a). Ideas might include;</p> <ul style="list-style-type: none"> <li>• Reliance on public transport</li> <li>• Seasonality</li> <li>• Popularity of different types of accommodation</li> <li>• Relative popularity of different types of facility</li> </ul> <p>AO4 = 1 mark</p>	1
04	4(a)	<p><b>Suggest a more appropriate method for presenting the data shown in Figure 6.</b></p> <p>Eg. Bar graph/chart Pie chart</p> <p>AO4 =1 mark</p>	1
04	4(b)	<p><b>Give a reason for your choice.</b></p> <p>Link to chosen method</p> <ul style="list-style-type: none"> <li>• Consists of discrete data/discontinuous data</li> <li>• Gives an accurate number for each month</li> <li>• Easier to identify differences across the year/see each separate set of data</li> </ul> <p>AO4 = 1 mark</p>	1
04	5	<p><b>What is the total environmental quality score for the area shown in Figure 8?</b></p> <p>1 mark for correct answer.</p> <ul style="list-style-type: none"> <li>• plus 2 (+2) /Just “2” is acceptable</li> </ul> <p>AO4 = 1 mark</p>	1

04	6	<p><b>Suggest one advantage and one disadvantage of using the technique shown in Figure 8 to measure environmental quality.</b></p> <p>Accept any reasonable points, which might include:</p> <p><b>Advantage</b> (1 mark)</p> <ul style="list-style-type: none"> <li>• Easy to read/understand</li> <li>• Quick to complete so a lot of data can be gathered</li> <li>• Does not require any complicated equipment</li> <li>• Could be given out and collected later</li> <li>• Quite easy to calculate and make comparisons</li> <li>• Do not need any particular skills to carry out the data collection</li> <li>• The features that make up the survey could be changed to suit the area and aim(s) of the enquiry.</li> <li>• Shows strength of opinion</li> <li>• Considers a range of factors</li> <li>• Turns subjective ideas into numerical data</li> </ul> <p><b>Disadvantage</b> (1 mark)</p> <ul style="list-style-type: none"> <li>• Not totally clear what the categories mean</li> <li>• Very subjective and based on opinions rather than facts</li> <li>• Some people may not understand the language and simply say anything</li> <li>• Levels of accuracy – if people are unsure they will tend to give a middle answer</li> <li>• Comparability (especially if completed by different people)</li> <li>• The range of possibilities is narrow so major differences may not show up</li> <li>• Requires mathematical skills to calculate/opportunity for mathematical error</li> <li>• Lacks specificity in relation to the values</li> <li>• Can end up with a narrow range of outcomes</li> </ul> <p>1 mark maximum for directly reversed point eg easy to calculate overall value/ hard to calculate value</p> <p>AO3 = 2 marks</p>	2
----	---	---	---

04	7	<p><b>Complete the scattergraph for River B by plotting the following data.</b></p> <p>One mark for accurately plotting the data Must be plotted where graph lines cross</p> <p>AO4 = 1 mark</p>	1
----	---	--	---

04	8	<p><b>Draw a line of best fit on the scattergraph for River B.</b></p> <p>Should have bottom left to upper right inclination and be roughly in the centre of the scatter/approximately the same number of points on either side. Line should have a lower gradient than line on River A. Must start at or near bottom left hand point of graph and end at a point between 60cm and 80cm on the vertical. Do not credit line that does not cover range of points (shortened line).</p> <p>Straight line only</p> <p>AO4 = 1 mark</p>	1
----	---	---	---

04	9	<p><b>Compare the relationship between distance from source and depth of river for the two rivers.</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Level</th> <th style="text-align: center;">Marks</th> <th style="text-align: center;">Description</th> </tr> </thead> <tbody> <tr> <td style="text-align: center; vertical-align: top;">2 (Clear)</td> <td style="text-align: center; vertical-align: top;">3–4</td> <td> <p>AO3 – Demonstrates clear application of knowledge and understanding of scattergraphs in interpreting the correlation between river depth and distance from the source.</p> <p>AO4 – Clear reference made to the data shown on the scattergraph.</p> </td> </tr> <tr> <td style="text-align: center; vertical-align: top;">1 (Basic)</td> <td style="text-align: center; vertical-align: top;">1–2</td> <td> <p>AO3 – Demonstrates limited application of knowledge and understanding of scattergraphs in interpreting the correlation between river depth and distance from the source.</p> <p>AO4 – Some reference made to the data shown on the scattergraph.</p> </td> </tr> <tr> <td></td> <td style="text-align: center; vertical-align: top;">0</td> <td>No relevant content.</td> </tr> </tbody> </table> <ul style="list-style-type: none"> <li>• Level 2 (clear) identification of the relationship between river depth and distance from the source, making some reference to the relative strength of the relationship. May consider anomalies. Direct use of data to make clear comparative observations.</li> <li>• Level 1 (basic) identification of the relationship(s) expressed by the scattergraph(s). Some implied use of data.</li> </ul> <p><u>Indicative content</u></p> <p>The command word is ‘compare’ therefore students will need to make reference to both graphs. The levels will reflect the extent to which students are capable of identifying a pattern that indicates a positive correlation whilst appreciating there is a difference in the strength of the relationship between the two graphs.</p> <ul style="list-style-type: none"> <li>• Answers must apply understanding to the pattern displayed in the scattergraphs. Answer may refer to:             <ul style="list-style-type: none"> <li>• number of points</li> <li>• pattern of dispersion</li> <li>• degree of clustering around the best fit line</li> <li>• anomalies.</li> </ul> </li> <li>• Credit use of data to express relative differences</li> </ul> <p>AO3 = 2 marks, AO4 = 2 marks</p>	Level	Marks	Description	2 (Clear)	3–4	<p>AO3 – Demonstrates clear application of knowledge and understanding of scattergraphs in interpreting the correlation between river depth and distance from the source.</p> <p>AO4 – Clear reference made to the data shown on the scattergraph.</p>	1 (Basic)	1–2	<p>AO3 – Demonstrates limited application of knowledge and understanding of scattergraphs in interpreting the correlation between river depth and distance from the source.</p> <p>AO4 – Some reference made to the data shown on the scattergraph.</p>		0	No relevant content.	4
Level	Marks	Description													
2 (Clear)	3–4	<p>AO3 – Demonstrates clear application of knowledge and understanding of scattergraphs in interpreting the correlation between river depth and distance from the source.</p> <p>AO4 – Clear reference made to the data shown on the scattergraph.</p>													
1 (Basic)	1–2	<p>AO3 – Demonstrates limited application of knowledge and understanding of scattergraphs in interpreting the correlation between river depth and distance from the source.</p> <p>AO4 – Some reference made to the data shown on the scattergraph.</p>													
	0	No relevant content.													

05	1	<p><b>Explain why the chosen location was suitable for the collection of data.</b></p> <p>Answer must relate to the title of the physical geography enquiry. Identifies 2 points (2x1) with limited explanation OR offers a developed point with clear reasoning.</p> <p>Answers will be dependent upon the type of investigation being undertaken, but could include some of the following:</p> <ul style="list-style-type: none"> <li>• accessibility – within walking distance (1), level ground (1), public access (1), no risks( 1)</li> <li>• safety considerations – away from unstable cliffs (1), water level not too deep (1), water flow not fast (1)</li> <li>• range of survey points available (1)</li> </ul> <p>Second mark for developed point (clear explanation of single point), eg</p> <ul style="list-style-type: none"> <li>• Range of survey points available (1) with enough variation within locality to show changes over distance (d)(1)</li> </ul> <p><b>Max 1 mark</b> if reference to human geography investigation.</p> <p>Note that there is no credit for the title in itself. Accept a range of titles if appropriate to physical geography.</p> <p>AO3 = 2 marks</p>	2
05	2	<p><b>Justify one primary data collection method used in your physical geography enquiry.</b></p> <p>Answer must relate to physical geography enquiry.</p> <p>1 mark – Identifies data collection method, eg: “a pebble survey was carried out on the beach”</p> <p>2 marks – Identifies data collection method and offers an appropriate reason, eg: “a pebble count was carried out on the beach (1) to show the location of different sized pebbles” (d)(1)</p> <p>3 marks – Identifies data collection method and offers a developed reason OR two separate reasons, eg: “a pebble count was carried out on the beach (1) to show the location of different sized pebbles (d)(1) to show the effects of the waves” (d)(1)</p> <p>Credit use of specific fieldwork equipment as part of primary data methodology</p> <p>1 mark- eg a flow meter was used in the study of the river 2 marks- eg, a flow meter was used in the study of the river (1) to measure the velocity at different points (d) (1) 3 marks eg a flow meter was used in the study of the river (1) to measure the velocity at different points (d) (1) to show how the flow of water varies from source to mouth (d) (1)</p> <p><b>Max 1 mark</b> if reference to human geography investigation.</p> <p>AO3 = 3 marks</p>	3

05	3	<p><b>Explain how one data presentation technique used in your human geography enquiry helped you to interpret the data.</b></p> <p>Only reference to <b>one</b> human geography data presentation technique required.</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Level</th> <th style="text-align: center;">Marks</th> <th style="text-align: center;">Description</th> </tr> </thead> <tbody> <tr> <td style="text-align: center; vertical-align: top;">3 (Detailed)</td> <td style="text-align: center; vertical-align: top;">5–6</td> <td> <p>AO3 – Demonstrates detailed evaluation of how the data presentation technique helped to interpret the data collected.</p> <p>AO3 – Makes a detailed judgement about how effective the data presentation technique was in helping to interpret the data collected.</p> </td> </tr> <tr> <td style="text-align: center; vertical-align: top;">2 (Clear)</td> <td style="text-align: center; vertical-align: top;">3–4</td> <td> <p>AO3 – Demonstrates clear evaluation of how the data presentation technique helped to interpret the data collected.</p> <p>AO3 – Makes a clear judgement about how effective the data presentation technique was in helping to interpret the data collected.</p> </td> </tr> <tr> <td style="text-align: center; vertical-align: top;">1 (Basic)</td> <td style="text-align: center; vertical-align: top;">1–2</td> <td> <p>AO3 – Offers limited evaluation of how the data presentation technique helped to interpret the data collected.</p> <p>AO3 – Makes a basic judgement about how effective the data presentation technique was in helping to interpret the data collected.</p> </td> </tr> <tr> <td></td> <td style="text-align: center; vertical-align: top;">0</td> <td>No relevant content.</td> </tr> </tbody> </table> <ul style="list-style-type: none"> <li>• Level 3 (detailed). Developed explanation of how the identified technique aided interpretation (eg made it easier to identify patterns/examine relationships/identify anomalies).</li> <li>• Level 2 (clear) Some explanation of how the identified technique aided interpretation.</li> <li>• Level 1 (basic) Limited explanation and possible description of a technique of data presentation. Some basic reasoning about how the technique aided interpretation of the data.</li> </ul> <p><u>Indicative content</u></p> <p>Any technique of data presentation is acceptable but the technique selected must relate to a human geography fieldwork investigation. The most likely techniques to be used are graphical and cartographical techniques. Numerical</p>	Level	Marks	Description	3 (Detailed)	5–6	<p>AO3 – Demonstrates detailed evaluation of how the data presentation technique helped to interpret the data collected.</p> <p>AO3 – Makes a detailed judgement about how effective the data presentation technique was in helping to interpret the data collected.</p>	2 (Clear)	3–4	<p>AO3 – Demonstrates clear evaluation of how the data presentation technique helped to interpret the data collected.</p> <p>AO3 – Makes a clear judgement about how effective the data presentation technique was in helping to interpret the data collected.</p>	1 (Basic)	1–2	<p>AO3 – Offers limited evaluation of how the data presentation technique helped to interpret the data collected.</p> <p>AO3 – Makes a basic judgement about how effective the data presentation technique was in helping to interpret the data collected.</p>		0	No relevant content.	6
