

Monday 13 May 2019 – Morning

GCSE (9-1) Computer Science

J276/01 Computer systems

Time allowed: 1 hour 30 minutes

| Do not use: • a calculator | | | |
|----------------------------|--|--|--|
| | | | |
| | | | |
| | | | |

| Please write clearly in black ink. Do not write in the barcodes. | | | | | |
|--|--|--|------------------|--|---|
| Centre number | | | Candidate number | | |
| First name(s) | | | ' | | |
| Last name | | | | | _ |

INSTRUCTIONS

- Use black ink.
- · Answer all the questions.
- Write your answer to each question in the space provided. If additional space is required, use the lined page(s) at the end of this booklet. The question number(s) must be clearly shown.

INFORMATION

- The total mark for this paper is 80.
- The marks for each question are shown in brackets [].
- Quality of written communication will be assessed in this paper in questions marked with an asterisk (*).
- · This document consists of 20 pages.

Answer all the questions.

| 1 | | ry wa ipute | ants to buy a new computer, but she does not understand what the different parts of a r do. |
|---|-----|----------------|---|
| | (a) | Keri | ry has heard of a CPU but does not know what it is. |
| | | (i) | The following sentences describe the purpose of a CPU. |
| | | | Complete the sentences by filling in the missing words. |
| | | | CPU stands for |
| | | | It is the part of the computer that fetches and executes the |
| | | | that are stored in |
| | | | The CPU contains the Arithmetic |
| | | | the Unit (CU). [5] |
| | | (ii) | Kerry is looking at two computers; one has a single core processor and the other has a dual core processor. |
| | | | Explain why having a dual core processor might improve the performance of the computer. |
| | | | |
| | | | |
| | | | |
| | | | |

.....[2]

| Explain how the cache size can affect the performance of the CPU. Both computers have RAM and ROM. I) The table has five statements describing RAM and/or ROM. Tick (✓) one or more boxes in each row to identify if that statement and/or ROM. RAM ROM Stores data The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and instructions | | omputer has 64 kilobytes of cache and | the other | has 512 k | ilobytes |
|---|---------------------|---|---------------|------------|----------|
| Both computers have RAM and ROM. i) The table has five statements describing RAM and/or ROM. Tick (✓) one or more boxes in each row to identify if that statement and/or ROM. RAM ROM Stores data The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | Explair | n how the cache size can affect the pe | erformance | of the CF | U. |
| Both computers have RAM and ROM. i) The table has five statements describing RAM and/or ROM. Tick (✓) one or more boxes in each row to identify if that statement and/or ROM. RAM ROM Stores data The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | | | | | |
| i) The table has five statements describing RAM and/or ROM. Tick (✓) one or more boxes in each row to identify if that statement and/or ROM. RAM ROM Stores data The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | | | | | |
| Tick () one or more boxes in each row to identify if that statement and/or ROM. RAM ROM | | | | | |
| Tick (🗸) one or more boxes in each row to identify if that statement and/or ROM. RAM ROM Stores data The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | 3oth compu | iters have RAM and ROM. | | | |
| Tick (🗸) one or more boxes in each row to identify if that statement and/or ROM. RAM ROM Stores data The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | (i) The tak | ole has five statements describing RA | \M and/or F | ROM. | |
| Stores data The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | | | to identify i | f that sta | tement |
| The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | | | | | |
| Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | | | RAM | ROM | |
| computer is turned off Data is read-only, cannot be changed Stores currently running data and | | Stores data | RAM | ROM | |
| Stores currently running data and | | | RAM | ROM | _ |
| | | The memory is volatile Data will not be lost when the | RAM | ROM | |
| | | The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be | RAM | ROM | |
| | | The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | RAM | ROM | |
| | ii) Give o ı | The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and | | ROM | |
| | i) Give o ı | The memory is volatile Data will not be lost when the computer is turned off Data is read-only, cannot be changed Stores currently running data and instructions | | ROM | |

| (c) | | ry has 5GB of files to transfer from her laptop at work to her new computer. She has been to buy an external solid state device to do this. |
|-----|------|---|
| | (i) | Give one example of a solid state device. |
| | | |
| | | [1] |
| | (ii) | Identify whether the device given in part (c)(i) is an example of primary or secondary memory. |
| | | |
| | | [41] |

(iii)* Kerry was originally going to use an optical storage device to transfer her files.

Discuss whether an optical or solid state device is the most appropriate media to transfer these files.

| You may • • • | want to consider the following characteristics in your answer: portability robustness capacity | |
|------------------------|--|----|
| • | cost | 8 |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

| | | |
| | | |
| | | |
| | | •• |
| | | |
| | | •• |
| | | •• |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

| The filesizes of Kerry's files are usually displayed in megabytes (MB) or gigabytes (GB). |
|---|
| Calculate how many MB are in 5GB. Show your working. |
| |
| |
| |
| MB [2] |

(iv)

Xander's tablet computer comes with system software, including an operating system and utility

| stem s | software. | |
|--------|---|--|
| The | e operating system provides file management. | |
| ldei | ntify three ways that Xander can make use of the file management facility. | |
| 1 | | |
| | | |
| •••• | | |
| | | |
| •••• | | [3] |
| | | s an |
| (i) | Explain how the compression software will compress the image file. | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | [4] |
| (ii) | Give the name of two other types of utility system software. | |
| | 1 | |
| | 2 | [2] |
| | The lder 1 2 3 The ima (i) | The operating system provides file management. Identify three ways that Xander can make use of the file management facility. 1 |

- (c) Xander also has a smart watch.
 - (i) Tick (✓) one box to show whether the smart watch or the laptop is an example of an embedded system.

| | Is an example of an embedded system |
|-------------|-------------------------------------|
| Smart watch | |
| Laptop | |

[4]

(b) If unauthorised access does occur, Hamish would like to use encryption to add another layer

| of p | rotection to his documents. |
|------|---|
| (i) | Explain how encryption helps to protect Hamish's documents. |
| | |
| | |
| | |
| | |
| | |
| | |
| | [2] |
| | [2] |

11 BLANK PAGE

PLEASE DO NOT WRITE ON THIS PAGE

(ii) One encryption method is a Caesar cipher.

This Caesar cipher moves each letter of the alphabet **one** place to the right.

The following table shows the original letters in the first row, and the new letters in the second row.

| - 1 | A | В | С | D | Ε | F | G | Н | I | J | K | L | М | N | 0 | Р | Q | R | S | Т | U | V | W | Х | Y | Z |
|-----|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | В | С | D | Ε | F | G | Н | Ι | J | K | L | M | N | 0 | Р | Q | R | S | Т | U | V | W | Χ | Y | Z | А |

For example, if the message read: HELLO

This would be stored as: IFMMP

The following pseudocode algorithm takes a string of uppercase letters as input and uses the Caesar cipher to encrypt them.

The functions used in the algorithm are described in the table:

| Function | Description |
|--------------------------|--|
| ASC(character) | Returns the ASCII value for <i>character</i> e.g. ASC ("A") returns 65 |
| CHR (ASCIIvalue) | Returns the single character for ASCIIvalue e.g. CHR (65) returns "A" |
| subString(Value, Number) | Returns the <i>Number</i> of characters starting at position <i>Value</i> (where 0 is the first character) |

Complete the pseudocode algorithm to perform a Caesar cipher.

```
01 message = input("Please enter your string")
02 newMessage = ""
03 messageLength = message.length
04 for count = 0 to .....
05
     ASCIIValue = ASC(message.subString(.....,1))
06
     ASCIIValue = ASCIIValue + .....
07
     if ASCIIValue >90 then
      ASCIIValue = ..... - 26
08
09
     endif
10
     newMessage = ..... + CHR(ASCIIValue)
11 next count
```

| | [| [1] |
|-------|--|-----|
| | Write line 12 to output the encrypted message in pseudocode or programming code. | |
| (111) | message. | ea |

| 4 | An office has a LAN (Local Area Network). The office has four employees who each have a laptop. |
|---|---|
| | The office also has one server and one networked printer. |

| (a) | The office is set up as a star network with a switch at the centre. All devices are connected to |
|-----|--|
| | the network using cables. |

| (i) | Draw the devices and connections in the office star network. All devices must be clearly |
|-----|--|
| | labelled. |

| [3 |] |
|---|---|
| i) Describe the role of the switch in the office network. | |
| | |
| | |
| | |
| | • |
| [2] | J |

| (b) | | office introduces a WAP (Wireless Access Point) to allow network access to wire ices. | eless |
|-----|------|---|-------|
| | The | office manager has noticed that the performance of the network has recently decrea | sed. |
| | (i) | Describe how introducing wireless access could have slowed down the network. | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | [2] |
| | (ii) | Identify two other factors that can affect the performance of a network. | |
| | | 1 | |
| | | 2 | |
| | | | |
| | | | [2] |
| (c) | Exp | lain what is meant by a Virtual Network. | |
| | | | |
| | | | |
| | | | ••••• |
| | | | |
| | | | [21 |

| The | e IP address 192.149.119.226 is linked to the website with a URL of https://www.ocr.org.uk |
|-----|---|
| (a) | When https://www.ocr.org.uk is entered into a browser, the website homepage is loaded. |
| | Describe the relationship between the website URL (https://www.ocr.org.uk), the IP address and the webserver. |
| | |
| | |
| | |
| | |
| | |
| | |
