

1 Match each algebraic expression with the correct description.

- $2x$
- $x + 2$
- $2 - x$
- $x - 2$

- two more than  $x$
- $x$  less than two
- two less than  $x$
- $x$  multiplied by two

2 There are  $k$  balls in each box.

a) For each picture, write an algebraic expression to describe the number of balls.

b) Which sentence is true?

A has more balls than B.

B has more balls than A.

More information is needed to know which has more.

3 The pink square has an area of  $8p$  squares.

The blue trapezium has an area of  $5t$  squares.

Write an expression for the total area of each compound shape.

a)

c)

b)

d)

4 Match each function machine with the correct expression.

$5(h + 2)$

$5h + 2$

$\frac{h}{2} + 5$

$\frac{h + 5}{2}$

5

a) Rosie has  $\pounds m$  in her purse.

She is given  $\pounds 4$  pocket money.

Write an expression for how much money she has now.

b) Rosie buys two books for  $j$  pounds each.

Write an expression for the total cost of the two books.

4 Match each function machine with the correct expression.

$h \rightarrow$	$\times 5 \rightarrow$	$+ 2 \rightarrow$	$5(h + 2)$
$h \rightarrow$	$+ 2 \rightarrow$	$\times 5 \rightarrow$	$5h + 2$
$h \rightarrow$	$\div 2 \rightarrow$	$+ 5 \rightarrow$	$\frac{h + 5}{2}$
$h \rightarrow$	$+ 5 \rightarrow$	$\div 2 \rightarrow$	$\frac{h + 5}{2}$

- 5
- Rosie has  $\pounds m$  in her purse. She is given  $\pounds 4$  pocket money. Write an expression for how much money she has now.
  - Rosie buys two books for  $j$  pounds each. Write an expression for the total cost of the two books.

- Rosie buys a cap for  $v$  pounds and two scarves for  $y$  pounds each. Write an expression for the total cost of the cap and two scarves.

6 There are  $g$  cupcakes in each box.

Dexter takes two cupcakes out of each box and eats them.

- Explain why Dexter's expression is incorrect.
- Write an expression that would correctly describe the number of cupcakes left. Compare your answer with a partner's. Is there more than one possible expression?

7 A grocer is selling some fruit.

- Strawberries  $\pounds r$  per 100 g
- Oranges  $\pounds 3m$  each
- Apples  $\pounds 2r$  per kilogram
- ★ Pears ★  
Special Offer  
 $\pounds 2m$  each or  
5 for  $\pounds 8m$

Write an expression for the total cost of the shopping on the list.

$\frac{1}{2}$  kg strawberries  
3.5 kg apples  
8 oranges  
7 pears
