

Parents and Carers

Tell us what you need to Support your Neurodiverse Child!

Services in Heywood, Middleton and Rochdale Integrated Care Partnership are continually thinking about what offers of support we can develop for children, young people and parents/carers needing help either with or without an autism or ADHD diagnosis. The views of parents and carers are important to ensure we have meaningful resources available that are right for families. Please scan the QR code to the right using your phone camera, which will take you to a short survey, where you can tell us your preferred topics for webinars and workshops and how you would like them to be delivered. It will only take a minute to complete the survey and your input is really valued.
