

Eco –schools Minutes

Date: Tuesday 30th October 2018

Attendees: Amy, Lewis, Dayton, Daniel, Kylie, Matthew, Scarlett, Ruby, Liam, Evie,.

All Eco-members were welcomed to the team and we discussed targets for this year under 4 main areas.

Waste- Eco-school team leaders are to ensure paper bins, food bins and general waste bins are sorted correctly at the end of each day in class. KS1 members are to ensure fruit waste is placed in the food waste bin for composting.

Litter – Litter picking will start from next week in the playground. Some children have noticed milk cartons and fruit on the playground. So we aim to reduce the litter by litter picking 3 times a week. We will remind children to use the bins outside for litter.

School Grounds – children want to develop the outside areas further. They would like a lunch time gardening club in the Spring term and

each class to grow vegetables that can be used in canteen for lunches.

Electricity – A new area for use to focus on this year is electricity and the team have discussed regular check in classrooms where members will check interactive boards and lights are switched off when leaving the rooms. We will also check toilet lights are switched off when children leave.

Competitions – We would like to run a competition in the Spring term for the school. The Eco-team are going to research ideas and bring them along to the next meeting.

Eco –code – Each class should have their Eco-code visible for all the school to follow. Team members will check this in every class.
