

# Challenge!

## Bright Ideas for a Better Middleton

Calling all young creators! We need your help to make our town an even better place to live. We're asking you to design something that could improve your community. Whether it's a fun park feature, a safer road design, a creative play space, or something completely new – we want to see your imagination at work!

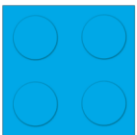

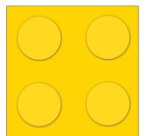

This is your chance to share your ideas that could make life in your town better for everyone. Think about things that could help the environment, make it safer, or just bring more joy to the people who live here.

### What can you design?

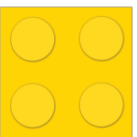

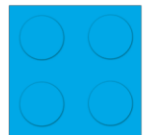

- A new play area or park feature
- A solution to make walking or cycling safer
- An environmentally friendly idea, like a community garden or recycling station
- Anything else that you think would improve the town!

### How to enter:

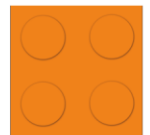

- Create a drawing or model of your design. You could use Lego or other building equipment. Why not design on your computer using Minecraft? Just take a photograph of your design and send it to your teacher on Dojo.
- Write a short description of how your design will help make the town better.
- Submit your design by Friday 21<sup>st</sup> March.

### Prizes and certificates are to be won for the best entries!

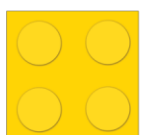

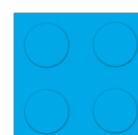

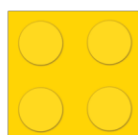

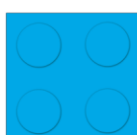

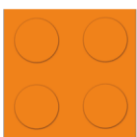

We can't wait to see your amazing ideas and how you imagine a brighter, better town. Let your creativity shine!

**What will you design to make  
Middleton a better place to live?**

**You can build it with Lego, design it on  
Minecraft or use your drawing skills to  
make a poster.**
