

Design Technology

Knowledge Building

Food Technology

Food technology is an area that focuses on the production, research, development, preservation and quality control of food products. It features a range of techniques in food preparation, as well as recognising the need for hygiene when working with food. Pupils will know where food comes from, how to prepare food safely, with and without a heat source, and finally explore different techniques used to make a wider range of dishes. There is a link with science here

Users and Purposes

In design technology, **users** are defined by the people who will use the product that is being designed. **Purpose** relates to designing solutions to improve people's lives. These two components need to work harmoniously together in order to create a design, and then, ultimately, a product that suits both. By making pupils aware of these two aspects, they can see how design technology evolves and develops until they recognise that some designs have impact beyond their intended **user and purpose**.

Product Research

Product research is the process of deciding which new products will be successful and then seeing how they could be developed. It can also involve looking at any existing similar products. Initially research is very basic in terms of like and dislike, but deeper research looks into aesthetics, functionality and the materials used. Pupils will expand their research skills to include these different areas and, ultimately, be able to link them to **users and purposes**.

Design Technology Vocabulary

The language of design technology can be broken down into different categories such as: the language of **design** e.g. draw, sketch, user, purpose; the language of **making**, for example, tools, equipment, materials and the language of **evaluation**, including discussion about the product, asking questions about its useability, reviewing and checking.

Product Features

Product features are aspects that make a product useful, fit for purpose and, sometimes, unique. They are attributes that appeal to **users** and make that particular product distinct. When designing a product, the features need to appeal to users, need to fulfil the purpose of the product and be influenced by research into products that may do the same thing. This aspect has strong links with **users and purposes** and **product research**. Pupils will learn how to identify features, discuss how useful they are and then explore how **product features** they actually benefit the product in terms of performance and usability.

Invention and Development

Design technology can be looked as two strands: **invention and development**. **Invention** is the process of thinking and making new products. The people who do this are **inventors**. **Development** looks at products and ideas that already exist and finds ways of making them better. It is important that pupils recognise that adapting and innovating designs / products is key in making new things. Initially, pupils will find out about well-known inventors and how their products and designs have improved life for others. They will learn about the need for problem-solving skills during the invention process, so that a product can be as functional and usable as possible. Pupils will also find out about copyrighting, trademarks and patenting ideas and products.

Design Technology

EXPLORERS

Knowledge Building

Food Technology	Users and Purposes	Product Research	Design Technology Vocabulary	Product Features	Invention and Development
Know that food comes from plants or animals and that food has to be grown or caught	Know what they are designing and making and say what its purpose is	Know what they like and dislike about a product	Know the names of simple construction tools and equipment	Know the key features that define a product	Know what inventors do and why they are important

Learning Progression

3 – 4 years	Reception
<ul style="list-style-type: none"> Explore different materials freely, in order to develop their ideas about how to use them and what to make Develop their own ideas and then decide which materials to use to express them Join different materials and explore different textures 	<ul style="list-style-type: none"> Safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function Share their creations, explaining the process they have used Create collaboratively, sharing ideas, resources and skills

Design Technology

Knowledge Progression

Explorers 1 / Nursery and Explorers 2 / Reception (Skills vocabulary in yellow)

Help Is At Hand

- To design a new lanyard with clear information and space for a photograph
- To be able to talk about preferences and design a pizza for themselves
- To identify what someone else prefers and design specifically for them

Key Vocabulary

model, badge, lanyard, design, photograph, I.D., words, preference, cook, share, favourite, junk modelling, gift

What On Earth...?

- To design and make a clay pot with the purpose of growing seeds
- To identify the features of a range of fabrics and talk about which they consider to be pretty
- To use their imagination when designing and making a model of a giant
- To know that some materials can be repurposed and reused to make something else
- To understand some of the processes involved in designing and making a particular item

Key Vocabulary

mould, design, make, model, pattern, texture, gift wrap, fabric, plant pot, clay

Additional Knowledge

Happy To Be Me

- To design a badge or medallion to show belonging

Design Technology

PATHFINDERS

Knowledge Building					
Food Technology	Users and Purposes	Product Research	Design Technology Vocabulary	Product Features	Invention and Development
Know how to prepare food safely and hygienically, without using a heat source	Know why they need to make products suitable for intended end users and how this influences design	Know the importance of research and using their findings in the design process	Know the names and properties of materials commonly used in the manufacture of products	Know the importance of including useful features within a product design	Know about significant inventors and developers and how they improved life for others
Skills Progression					
Design Technology Skills Pathfinders 1 / Y1			Design Technology Skills Pathfinders 2 / Y2		
Dt1 Explore the sensory qualities of materials Dt2 Explore ways to construct models Dt3 Identify a target group for what they intend to design and make Dt4 Recognise how structures can be made, stronger, stiffer and more stable Dt5 Generate and talk about their own ideas Dt6 Follow safe procedures Dt7 Take account of simple properties of materials when deciding how to cut, shape, combine and join them Dt8 Use tools and materials with help			Dt9 Explore a range of existing products Dt10 Discover where foods come from in choosing, preparing and tasting different dishes Dt11 Identify a purpose for what they intend to design and make Dt12 Identify simple design criteria then plan what to do next, using a variety of methods Dt13 Observe and take account of properties of materials when deciding how to cut, shape, combine and join them Dt14 Identify what they could have done differently or how they could improve their work in the future Dt15 Evaluate a range of existing products Dt16 Communicate their ideas using a variety of methods e.g. drawing, making, mock-ups, ICT Dt17 Measure, mark, cut out and shape a range of materials Dt18 Use mechanisms in the products e.g. wheels, sliders Dt19 Use simple finishing techniques Dt20 Talk about their ideas, saying what they like and dislike, and evaluate against their design criteria

Pathfinders

Design Technology - Cooking and Nutrition

- Use the basic principles of a healthy and varied diet to prepare dishes (NC)
- Understand where food comes from (NC)

Core 1 Unit 1 Lesson 1: Healthy Eating – Vote Green!

Concepts

- Learn about where vegetables and fruit grows
- Understand the social aspect of eating food together
- Know that making good choices about food will improve their health and well-being

Core 1 Unit 1 Lesson 2: Healthy Eating - Meat Eaters (within Come Fly With Me! Arctic Circle)

Concepts

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Understand the need for protein as part of a balanced diet
- Recognise which types of food are healthy
- Know how to make simple choices that improve their health and wellbeing

Core 1 Unit 1 Lesson 3: Healthy Eating - Party Time!

Concepts

- Know the principles of planning and preparing a range of healthy meals
- Apply their knowledge of healthy eating to plan a menu for a themed party

Adventurers 1 / Year 3	Adventurers 2 / Year 4
<p align="center">ATHENS VS SPARTA - Mechanisms - Structures</p> <p> In Pathfinders, pupils learnt that good design is an importance component in the construction of strong structures. In this unit, pupils will discover how a strong structure and an accurate mechanism can be combined to make a siege weapon. Pupils will need to carefully consider the purpose of their product and include some key features to allow it to work. They will also need to work through processes of problem solving in order to achieve the best firing mechanism.</p> <p>Skills Development Task</p> <p>Concepts</p> <p>NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately</p> <p>Apply their understanding of how to strengthen, stiffen and reinforce more complex structures</p> <ul style="list-style-type: none"> Design, make and evaluate a siege weapon (trebuchet) 	<p align="center">PICTURE OUR PLANET - Textiles</p> <p> Pupils already have some experience of working with textiles and combining two pieces of materials together using needle and thread. In this unit, pupils will need to use sewing skills to make a soft toy, therefore they will learn how to use stuffing to pad out two pieces of fabric. They will also need to consider how their toy looks as well as being robust enough for a toddler to play with.</p> <p>Skills Development Task</p> <p>Concepts</p> <p>NC - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design</p> <p>NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately</p> <p>NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities</p> <p>NC - Investigate and analyse a range of existing products</p> <ul style="list-style-type: none"> Design and make an animal soft toy, aimed at toddlers, in association with the Scottish Wildlife Trust
<p align="center">COME FLY WITH ME! AFRICA - Food Technology</p> <p> This unit focuses on food technology. Pupils will expand their understanding of where food comes from by recognising that a lot of food products come from African countries, and they will look at Fairtrade as an organisation that ensures farmers and growers get a fair price for their produce. Pupils will learn how to prepare and make a range of African inspired dishes. They will need to consider hygiene and safety when using heat sources and also think about how their food is presented from a design technology perspective.</p> <p>Concepts</p> <p>NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately</p> <p>NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities</p> <p>NC - Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques</p> <p>NC - Understand seasonality and know where and how a variety of ingredients are grown, reared, caught and processed</p> <ul style="list-style-type: none"> To learn some basic cooking skills 	<p align="center">COMPETENCY UNIT - 'VIKING WARRIOR'- THE STORY OF RAGNAR LOTHBROK</p> <p>Revisit the part of Ragnar's saga that refers to him wearing a pair of trousers or breeches that protected him from his battle with the dragon or snake (depending on which part of the story you believe!). His trousers were coated in pitch to give them a protective covering.</p> <ul style="list-style-type: none"> After discussing this, explain to the pupils that they are now going to design and make their own pair of hairy trousers to protect themselves in battle. They will need to have some furry or hairy materials to use and then they need to think about a way to cover the hair / fur to protect it. Suggestions could be:- glue, glue and water mix, paint, wallpaper paste, foil. Hand out the design sheet and ensure pupils give reasons for their choice of trouser covering. Can they find a way to test how protective the covering would be by using a pin to see how easy it would be to make a hole in their hairy trousers? <div data-bbox="1854 999 2119 1102" style="text-align: right;">  <p>The Story of Ragnar Lothbrok</p> </div>
	<p align="center">PICTURE OUR PLANET - Food Technology</p> <p> Pupils will learn about the history of the traditional Scottish sweet, Tablet. They will need to follow the recipe provided and then experiment with different flavours to make it individual to them. They will take feedback on their creations, and this could then be expanded to selling their flavoured table at a later date.</p> <p>Concepts</p> <p>NC - understand and apply the principles of a healthy and varied diet</p> <ul style="list-style-type: none"> To make the traditional Scottish sweet, tablet

Design Technology

Food Technology within PSHE

Adventurers

Design Technology - Cooking and Nutrition

- Understand and apply the principles of a healthy and varied diet (NC)
- Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques (NC)
- Understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed (NC)

Core 1 Unit 3 Lesson 1: A Balanced Diet – Plant or Animal (within Come Fly with Me! Africa)

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Know where different foods come from

Core 1 Unit 3 Lesson 2: A Balanced Diet – Balancing Act (within Come Fly with Me! Africa)

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Know about and understand the function of different food groups for a balanced diet

Core 1 Unit 3 Lesson 3: Working With Food – Master Chef

Concepts

- Know the principles of planning and preparing a range of healthy meals

Core 1 Unit 3 Lesson 4: Working With Food – Our Food Hall

Concepts

- Learn to prepare and cook a variety of dishes

Knowledge Building					
Food Technology	Users and Purposes	Product Research	Design Technology Vocabulary	Product Features	Invention and Development
Know how to use a range of techniques such as peeling, slicing, grating, kneading and spreading	Know what impact products have beyond their intended purpose	Know how to gather information about the needs and wants of groups and individuals	Know the correct technical vocabulary for the projects they are undertaking	Understand the relationship between a product's features and its functionality and usability	Know and understand the importance of patent, copyright and trademark in the design process
Design Technology Skills Navigators 1 / Y5			Design Technology Skills Navigators 2 / Y6		
Dt35 Investigate ways of meeting design challenges with a construction focus Dt36 Investigate how the work of individuals in design and technology has helped to shape the world Dt37 Identify users' views and take these into account Dt38 Analyse a range of existing products Dt39 Estimate and measure using appropriate instruments and units Dt40 Plan what they have to do, including how to use materials, equipment and processes Dt41 Communicate design ideas in different ways e.g. discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer aided design Dt42 Apply knowledge of mechanical and electrical control when designing and making functional products Dt43 Refine sequences of instructions to control events or make things happen			Dt44 Explore alternative ways of making their product, if first attempts fail Dt45 Check work as it develops and modify as necessary Dt46 Evaluate their products, identifying strengths and areas or development, and make appropriate changes Dt47 Draw on and use various sources of information, including ICT sources Dt48 Generate and clarify ideas for products, considering intended purpose Dt49 Plan what they have to do, suggesting a sequence of actions and alternatives if needed Dt50 Choose how to communicate design ideas as they develop, considering use and purpose Dt51 Select from a wide range of tools and equipment to perform practical tasks accurately		

Design Technology

Knowledge Progression

Navigators 1 / Year 5

You're Not Invited

Pupils will be using The Extraordinaires Soldier project in this unit. Pupils will have extensive experience of the processes involved in researching, designing, making and evaluating for a range of products for a variety of users. In this unit, pupils are required to consider the needs of a real-life Extraordinaire. They will need to think about the impact their product has beyond its intended purpose; how will work with the rest of the Soldier's equipment? Pupils will also need to address the relationship between the product's features and its functionality.

Concepts

NC - Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed a particular individuals or groups

NC - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately

NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

NC - Investigate and analyse a range of existing products

NC - Evaluate their ideas and products against their own design criteria and consider the views of others to improve their work

- Design and make a sleeping place suitable for a soldier

Mission Control

Pupils will be using The Extraordinaires Spaceman project in this unit. Pupils will have extensive experience of the processes involved in researching, designing, making and evaluating for a range of products for a variety of users. In this unit, pupils are required to consider the needs of a real-life Extraordinaire. They will need to think about the impact their product has beyond its intended purpose; how will work with the rest of the Spaceman's equipment and in his limited workspace? Pupils will also need to address the relationship between the product's features and its functionality.

Concepts

NC - Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed a particular individuals or groups

NC - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately

NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

NC - Investigate and analyse a range of existing products

NC - Evaluate their ideas and products against their own design criteria and consider the views of others to improve their work

- Design and make a model of a time-keeping device suitable for a spaceman

Navigators 2 / Year 6

A World Of Bright Ideas

Pupils will be introduced to new vocabulary and understand how important patent, trademark and copyright are in the invention and development of products. They will compare brand names and logos; recognising that a memorable logo is a great way of encouraging people to remember a brand or product.

Concepts

NC - Understand how key events and individuals in design and technology have helped shape the world

- To understand the meaning of the term 'copyright' and learn about why it is important
- To know about and understand what a patent is
- To know about and understand what a trademark is
- To design a new brand for a range of greetings cards

I HAVE A DREAM - Textiles

Pupils will draw on the knowledge and skills learn in previous pathways to create a useable and aesthetically pleasing textile product. They will use sewing skills to join more than one piece of fabric together using more complex stitches, as well as have potential opportunity to use a sewing machine. They will need to stuff and secure their cushion so that it is comfortable for someone to use.

Skills Development Task

Concepts

NC - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

- Make a cushion following a pattern

Design Technology

Knowledge Progression

Navigators 1 / Year 5	Navigators 2 / Year 6
<p>FULL OF BEANS - Electronics 2</p> <p> Through science, pupils have experimented with designing, making and testing a range of electrical circuits with different components. Now, they will implement this knowledge and these skills to produce a circuit that has a clear purpose. Pupils will need to consider the features of their circuit and how it relates to its functionality. They will also address that their design has impact in other ways.</p> <p>Skills Development Task</p> <p>Concepts</p> <p>NC - Understand and use electrical systems in their products (for example, series circuits incorporating switches, bulbs, buzzers and motors)</p> <p>NC - Apply their understanding of computing to program, monitor and control their products</p> <ul style="list-style-type: none"> Design, make and evaluate a traffic control system 	<p>WARS OF THE WORLD - Electronics 1</p> <p> Through science, pupils have experimented with designing, making and testing a range of electrical circuits with different components. Now, they will implement this knowledge and these skills to produce a circuit that has a clear purpose. Pupils will need to consider the features of their circuit and how it relates to its functionality. They will also address that their design has impact in other ways.</p> <p>Skills Development Task</p> <p>Concepts</p> <p>NC - Understand and use electrical systems in their products (for example, series circuits incorporating switches, bulbs, buzzers and motors)</p> <p>NC - Apply their understanding of computing to program, monitor and control their products</p> <ul style="list-style-type: none"> Design, make and evaluate a device to send Morse Code signals
<p>COME FLY WITH ME! AMERICA – Dreamcatcher</p> <p> Pupils will sketch, design using annotations and then make a dreamcatcher using models and video presented to them as inspiration. They will find out about the origins of the dreamcatcher and recognise some of the key design features needed. Before making, pupils will need to identify the materials and colours they will use.</p> <p>Mechanisms - Structures 1</p> <p>Previously, pupils have learnt how specific mechanisms play a role in constructing strong and useful structures. In this unit, pupils will work through several processes to initially build a strong frame and then join these frames together to form a bridge. Pupils will be required to consider not only their design but also the materials, tools and techniques they will use in order to complete their project.</p> <p>Skills Development Task</p> <p>Concepts</p> <p>NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately</p> <p>NC - Apply their understanding of how to strengthen, stiffen and reinforce more complex structures</p> <ul style="list-style-type: none"> Create a frame structure Join up frames to create a bridge 	<p>A WORLD OF BRIGHT IDEAS - Mechanisms - Structures 2</p> <p> Pupils will now use their advanced knowledge of frames and structures to build a 'racer' vehicle with a strong, stable structure and a motor powered by a simple electrical circuit. Pupils will be required to consider not only their design but also the materials, tools and techniques they will use in order to complete their project.</p> <p>Skills Development Task</p> <p>Concepts</p> <p>NC - select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately</p> <p>NC - Understand and use mechanical systems in their products (for example, gears, pulleys cams, levers and linkages)</p> <p>NC - Understand and use electrical systems in their products (for example, series circuits incorporating switches, bulbs, buzzers and motors)</p> <ul style="list-style-type: none"> Design, make and evaluate a three wheeled 'racer'

Design Technology

GLOBAL WARNING - Board Game Product Design

Pupils will design and make a board game based on learning about pollution and waste. They will evaluate existing games before designing and making a prototype of their game in small 'business groups'. Once complete, they will present and demonstrate their game.

Concepts

NC - Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups

NC - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

NC - Investigate and analyse a range of existing products

- To design and make a prototype board game on pollution and waste using existing board games as research

Food Technology within PSHE

Navigators

Design Technology - Cooking and Nutrition

- Understand and apply the principles of a healthy and varied diet (NC)
- Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques (NC)
- Understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed (NC)

Core 1 Unit 2 Lesson 1: Food Choices – Secret Eaters

Concepts

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Know about the different food groups and their related importance as a part of a balanced diet
- Develop an awareness of their own dietary needs

Core 1 Unit 2 Lesson 2: Food Choices – Invention Team (within A World of Bright Ideas)

- Know the principles of planning and preparing a range of healthy meals

Core 1 Unit 2 Lesson 3: Cooking – Michelin Stars (within A World of Bright Ideas)

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Know how to cook and apply the principles of nutrition and healthy eating
- Prepare and cook with a variety of ingredients, using a range of cooking techniques

Design Technology

End Goals

Explorers / EYFS

Our aim in teaching design technology in Explorers is to inspire pupils to not only be creative but create for a purpose. Pupils should be aware that when they are designing and making, they need to think about it is they are making and the reasons why they are making it; what is the purpose? In this phase, pupils will have had opportunity to carry out some basic product research by pointing out some of the key features of a product, such as in Help Is At Hand knowing that a lanyard requires a photograph and the name of the person. They should also be able to give some simple feedback and evaluation by stating whether they like or dislike a product. Pupils should be able to name the tools and materials they are using to make their designs and recognise some techniques of how they are constructing their models. Explorers should also have had an introduction to the role of inventors as people who invent useful products and that they don't always succeed first time; they often have to try numerous times before they get their product right.

Pathfinders / KS1

Our aim in teaching design technology in Pathfinders is to broaden pupils' awareness of designing for purpose. By the end of this phase, pupils should recognise that inventors and designers are not designing for themselves, they are designing for end users. This can be one person, as the pupils will have experienced with their first Extraordinaires projects, or it can be for a large group of people. Pupils should be able to carry out some research into existing products and use this to guide their own designs noting useful features. As well as learning about designing for a more focused purpose, pupils should have started to be aware of a range of skills and techniques that will help them when it comes to modelling their designs. They should recognise the importance of using suitable materials and notice how some everyday objects can be used to make effective mechanisms. Pupils should be aware that models of their designs may require testing, especially if there are moving parts and adjustments may need to be made to make them work efficiently. Evaluative vocabulary should be extended beyond 'like' and 'dislike' with comment on how their work could be improved or note features that are particularly pleased with.

Adventurers / LKS2

Our aim in teaching design technology in Adventurers is to encourage pupils to make links between purpose, functionality and aesthetics. In this phase, pupils will have the opportunity to design for two more Extraordinaires. These personas require more thought and consideration of their requirements than in Pathfinders. Pupils should know that they need to not only focus on purpose and some key features but now bear in mind how the product looks and feels for their user. They should consider materials that not only work well for construction but look aesthetically pleasing too.

The Adventurers phase sees pupils learn some basic cooking skills and recognition of where their food comes from. Pupils should be aware that much of their food comes from overseas and that seasonality is important when trying to source various ingredients. They should know how to prepare food hygienically and cook safely whilst remembering that food, like other products they have designed and made, needs to be presented attractively for people to enjoy. By the end of this phase, pupils should be more confident in evaluating their own work and be able to give more detailed criticism, both positively and negatively. They should understand the importance of problem solving in the invention process and be able to make adjustments to their designs. Pupils should now be able to give some feedback to their peers, suggesting ways they could improve or noting a feature that is particularly well designed.

Navigators / UKS2

Our aim in teaching design technology in Navigators is to embed knowledge and skills from the previous phases with a greater awareness of design in the wider world. Pupils should be aware that products can often have more than one function or purpose and be able to recognise the impact this has on its useability. They should know that there is a clear relationship with the features of a product and the functionality of it. They should ask themselves regularly, does this feature enhance this product? Is this feature necessary to the needs of the end user?

The Navigator Extraordinaires are based on real people; a soldier and a spaceman, both of whom have very specific requirements and restrictions. Pupils should be able to consider the wider issues these personas have when designing and making their products for them. Thoughts on how versatile their product is and how it could impact on other equipment should be considered.

By the end of this phase, pupils should have an awareness of the legalities that comes with designing and making a unique product. They should know the terms of 'trademark', 'patent', 'copyright', 'brand' and 'logo'. They should understand that these terms and processes allow inventors to keep their inventions safe and ensure that they earn the recognition they deserve for a design that is their own work. Additionally, Navigators, should be able to see the links between design technology and other subjects such as science. They should see that their knowledge of electricity, for example, can be put to practical use in technology tasks.
