

EYFS Knowledge Organiser: Planting, growing and change Term: Spring 2 Term 2

Grow
Grow means that something increases in size.
A seed can grow into a plant.

Roots
A root is the part of the plant which attaches the plant to the ground and sucks up water.

Leaf
A leaf is attached to the stem or stalk and helps the plant to make its food.

Stem
The stem is the main part of the plant.

Flower
The flower holds the seeds and is colourful to attract insects.

Tools
Tools are some of the things we use when we are gardening like trowels, forks and spades.
