

Nursery Knowledge Organiser: I wonder how plants grow?

Term: Spring 2

Spring  
Spring is one of the four seasons. It is a time when things start to grow.

Seed  
A seed can grow into a plant.

Roots  
A root is the part of the plant which attaches the plant to the ground and sucks up water.

Leaf  
A leaf is attached to the stem or stalk and helps the plant to make its food.
