

# Year 1 Science Knowledge Organiser - Plants

daisy

dandelion

rose

pansy

sunflower

buttercup

beech tree

oak tree

## Vocabulary

deciduous	a tree that loses its leaves in autumn
evergreen	a tree that stays green all year
sap	a liquid of water and nutrients for the plant
bark	the outside of a tree
trunk	the stem of a tree
branches	they grow out from its trunk and have leaves, flowers, or fruit growing on them
blossom	a flower or group of flowers on a tree

## Key Information

Evergreen leaves are spikey and don't taste very nice to stop animals from eating them.

Leaves are all different shapes and sizes.

Some tree roots can be seen above the ground.

Wild plants are those which aren't grown by people.

## Misconceptions

Some people think that trees are not plants but trees are a type of plant.

Some people think that all leaves are green but they are not.

Some people think that a trunk and a stem are different but a trunk is a type of stem.

Some people think that plants are not living things but they are.
