

Vocabulary	
Coastal erosion	Where the sea wears away the land.
Coastline	The area where the land meets the sea.
Cliff	A steep rock face.
Seawalls	Walls built with a steep face that are built along the coast.
Sediment	Eroded stones and sand.
Groyne	A structure built along the shoreline to interrupt the flow of water and sediment.
Notch	A worn away part of a cliff.
Tourist	Visitors.

Groynes help defend against coastal erosion

Key Information
The coastline of a country is forever changing due to coastal erosion.
Coastal erosion cannot be stopped but we can do things to slow the process down like build sea-walls and groynes.
Tourism is good for places because it brings money and it gives local people jobs.
Tourism can be bad for places because they can be overcrowded and this can lead to traffic jams, the jobs are seasonal, damage to the environment (Litter, habitat loss due to new buildings).
There are signs and flags on beaches to keep everyone safe.

Key Diagrams

UK map

Sea walls help coastal towns to defend against the strength of the sea.

Compasses help us to identify position and direction.
