EXAMS from
2nd week in
May to last
week in June

You might get some extra help to boost your grades after these mocks

Leavers
Assembly &
Prom

Mock results will help your teachers to give you an accurate predicted grade for College / Apprenticeship applications

November mocks will feel less stressful than Year 10 ... you already know what it feels like to go into an exam – you know what to expect & what to do

You might get some extra help to boost your grades after these mocks

YEAR
11

Stay on target ... keep revising and being ready for mocks ... save notes / flash cards to the next exams

While they are an important practice run, these are just a practice, so don't get too stressed

IN the exams ... Be on time – 8:45am for a 9:00am start, 1:10, for a 1:30pm start. No phones, watches or notes, no talking, no toilet breaks in the 1st or last 20mins. Do the best you can!

You should
get your
results
before the
summer
holiday

Mentoring, stress management & wellbeing support ... we are here to help

Some students need a bit extra in their exams e.g. Extra Time, a Reader, rest breaks, a small room

Access Arrangements testing with Janet Rigby will show us what you need in your exams ... this happens in Year 10 & 11

Your teachers will tell you which topics will come up ... revise by making flash cards or mind maps & doing practice exam questions

Don't
panic, it's
only a
practice

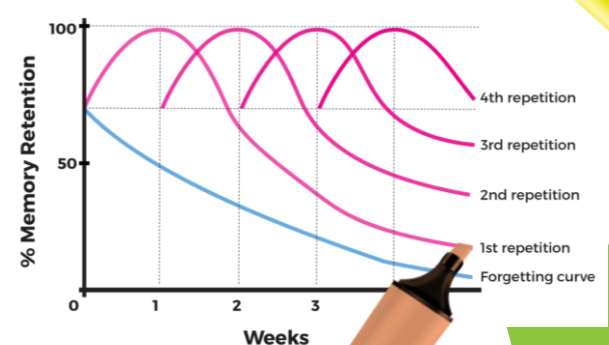

**YEAR 10
Summer
Mock
Exams**

Mock exams might show up that you need Access Arrangements

4 or 5 weeks before the exams, you will get a Mock exams timetable covering 2 weeks (end of June, start of July).

**Do I need
'Access
Arrangements'
in exams?**

Don't just read notes ... put facts on flash cards ...
not too much on each card and add some colour

Teachers
will give
you topic
lists &
notes /
knowledge
organisers

Revising a bit as you go along helps to keep things in your long-term memory ... little and often is the key to this, which is why teachers give you lots of little tests on topics you did a while ago, rather than the topic you're doing now ...

Don't just read notes ... put facts on flash cards ...
not too much on each card and add some colour

Some more creative GCSEs
are 100% 'portfolio' work
... every lesson counts!

GCSEs tend to be 100% exam based with 2 or 3 exams to prepare for each

Picking your Options

Everyone does core subjects ... maths, English
(Lit & Lang) & Science (Bio, Chem, Physics)

BTECs have coursework that you do as you go along and exams which you can repeat

Subjects I enjoy and will take seriously and do my best in at GCSE ... that means homework, coursework and revision
