

## Numicon activities

Make a number line to 5, 10, children to notice how it goes up by one more (height).

Number bonds to 10, notice how they stack together, use for simple addition

Build a tower and knock over, start again, count as it gets higher

Sensory tray fun- foam, see the holes, stamp in paint, playdough, add cereal hoops into the numicon

Fill the spaces on the matt

Name the colours, make different shapes, draw around and make a picture ie a house, robot, face

Place in a feely bag, can you guess the number, child to finger number of holes

Explore size (big and small) order them, notice how they go up by one, different ways to make up a number the Numicon sit on top of each other to make a good visual.

Weigh numicon- the same amount should weight the same- measurement
