## FS Understanding the World Project Week 1

### Will it sink or will it float?

#### Will it sink or will it float?

What you will need:

- Container
- Bath
- Water
- Different materials (paper, cardboard, plastic, metal, wood etc)

Talk to the children about each of the different objects and encourage them to talk about the material each object is made from.

Work together to fill the container or the bath and make predictions “What will happen if we put the plastic in the bath? Do you think it will float or sink? How do you know?”

Take it in turns to place the objects into the water and observe what happens. You can repeat the activity using every day/ household objects.

The children could take photographs or draw a picture to record their scientific investigations.
