

## Science

Throughout this half term, we are learning all about light and shadow. We will be learning about what light is, where it comes from, how shadows are formed and how shadows change throughout the day.

Why not try to make your own sundial outside at home and mark where the shadow is at different times of the day!

## Homework Menu Year Three

### D.T.

Last half term you attempted to make your own Stone Age tool.

As we will be making our own roundhouses at school, we need something to go in it.

Why not try to make a Stone Age tool box?

Or a stone age dresser?

Why not decorate it to make it personal to you?

## Geography

We will be learning all about the countries that make up the UK during this half term.

Produce a poster about one of the countries in the UK with lots of different facts all around it.

## History

We will be continuing our journey from the Stone Age to the Iron Age with a focus on the Iron Age this half term.

Try and write a diary about a day in the life of an Iron Age villager.

[Daily Life in an Iron Age Villager](#)

IRON AGE

## Maths

Knowing our times tables are a key building block for helping us to progress in Maths.

Practise your times tables as often as possible using Times Table Rockstars!
