

SMARTPHONE-FREE SCHOOL POLICY

Name of Responsible Manager / Headteacher:	Mr JDF Martin
Policy Owner:	Miss R Willmouth
Date of Policy Approval by Governing Body:	June 2025
Date of last Policy Review:	September 2026
Date of next Policy Review:	September 2027

Introduction

We are committed to providing a safe, focused, and inclusive learning environment for all our pupils. As part of this commitment, we are introducing a Smartphone-Free School Policy, effective from September 2025. This policy reflects our belief that primary-aged children benefit most from real-life social interactions, hands-on learning, and time away from digital distractions. By limiting the presence of smartphones and internet-enabled devices on school grounds, we aim to support children's emotional development, protect their wellbeing, and encourage a stronger sense of community within our school. We ask for the support of parents and carers in helping us uphold this important approach.

This policy applies from September 2025 onwards.

Smartphone ban – a staggered approach

- From September 2025, only pupils in Year 6 will be allowed to bring in a smartphone, although brick phones are still preferred. All other pupils must not bring in a smartphone at all. If necessary, a brick phone allowing voice calls and texts without internet access is allowed.
- From September 2026, no pupils will be allowed to bring in a smartphone. If necessary, a brick phone can be brought in to school.
- For pupils in Years R-4 we are not expecting the need to bring in mobile phones of any type.
- Any phone that is brought in must be handed in upon arrival and will be stored securely by school staff and returned to the pupil when leaving. These phones will not be used during the school day and must be turned off whilst at school.
- If there is a medical reason why a child requires a smartphone, this must be discussed with the Headteacher first.

Rationale

- We do not support children owning a smartphone, as growing evidence indicates that they impact:
 - Pupils' development of critical thinking and emotional regulation skills
 - Pupils engaging in real-life social interactions
 - Pupils' privacy risks and access online dangers
- We promote a smartphone-free environment to encourage face-to-face interaction and reduce distractions (this is during the time any child is on the school premises, school trips and residential).
- Children are not permitted to have smartphones on school premises unless prior arrangements have been made with the Headteacher on medical grounds.

- Parents/carers are encouraged to support this policy by ensuring that children do not bring smartphones to school.
- In the event of a child having a smartphone in school, it will be collected by the child's class teacher and if necessary, if the situation persists it will be reported to the leadership team. Parents will be asked to collect the phone, and reasonable steps will be taken to address concerns and risks.

Risks Associated with Smartphone Use

Smartphones offer advanced features, including internet access and social media. Evidence suggests this can lead to various risks:

- Cyberbullying: Smartphones can facilitate harassment, making it difficult for pupils to escape bullying.
- Exposure to inappropriate content: Unfiltered internet access can expose children to unsuitable material.
- Mental Health concerns: Excessive use can contribute to anxiety and depression.
- Distraction from learning: Smartphones can disrupt the learning process.
- Privacy and Security Risks: Children may not understand how to protect their personal information, leading to a greater risk of exploitation.
- Self-obsession and personal curation: The culture of selfies and social media can create confidence issues.

Confiscation and Sanctions

- The school reserves the right to use sanctions for breaches of the mobile phone policy, including confiscation and suspension.
- Any smartphone or internet-linked device (e.g. smart watches, smart glasses) found on school premises will be confiscated and returned only to a parent or carer.
- Brick phones are permitted for the journey to and from school, but if they are not handed in to the class teacher during school hours, they will also be confiscated and returned to a parent or carer.
- Repeated violations may result in consequences in line with our Behaviour Policy.
- Staff are protected from liability when confiscating items if they act lawfully and proportionately.

Pupil tracking

Where children are due to attend school trips or off-site visits, we do not allow the use of any tracking or GPS device for an individual child. This increases risk to all children involved and is against our safeguarding protocols. We do not allow children to have trackers or electronic tags for location monitoring whilst at school.

What is a brick phone?

A brick phone (also called a dumbphone or feature phone) is a basic mobile phone that primarily offers call and text messaging capabilities, while a smartphone is a more advanced mobile device with internet access and a wide range of apps. Brick phones are generally simpler and less feature-rich than smartphones, lacking internet access, apps, and complex operating systems.

Appendix 1 – Example Alternative Options to Smartphones

This list is not comprehensive, and acts only to give examples. They are not recommendations.

Nokia 105 £19.99

Sim-free mobile phone
Talk, text and wireless FM radio
Very good battery life
Torch and snake game

Nokia 2660 Flip £50-60

Texts and phone calls
Very long-lasting battery
Range of colours
Bright, colourful display (non-pixelated text)
Built in FM radio, MP3 player and torch
Snake (and Tetris but you need to pay for the full game)
Single rear facing camera (no selfies!)

Nokia 5710 £74.99

Like an iPod with in-built wireless earbuds which charge when not in use
Inbuilt mp3 player with storage for thousands of songs
Inbuilt speaker
Wireless FM radio
Great sound quality
Great battery life
No WIFI or Whatsapp

Appendix 2 – SIM Card Details

When purchasing a SIM card for your child's phone, we advise that it has no data within the contract, but rather only calls and texts. This is so that there is no chance that they can access the internet. Asda, amongst a few other mobile providers, offer this type of SIM card. This is not a recommendation but a suggestion.
