

Subject Vision 2022-23

Subject: Science

Leaders: C Simpson

To be reviewed September 2023

“The Science of today is the technology of tomorrow,” (Edward Teller).

At Castle Hill Primary school, we strive to empower a generation of collaborative, curious, enthusiastic and revolutionary thinkers. Our learners will ask questions to develop their critical and logical thinking skills, enabling them to make sense of the ever changing world around them and to see the ‘bigger picture’ by finding connections. Our children will operate as Scientists by working systematically to build on their existing knowledge and develop new skills to solve problems, sparking awe and wonder.
