

Maths

As mathematicians, we will be learning the Place Value of numbers. Then, we will be covering measurement by looking at length and mass. The third topic we will start delving into is Addition and Subtraction, so get your fingers ready!

Unlocking potential together
in faith and love.

English

As readers and writers, we will continue to build our phonics knowledge. We will learn to orally compose sentences and then use our phonics knowledge to write them. We will begin to learn where capital letters and full stops should appear in a sentence. We will be listening to and talking about lots of interesting books.

RE

As theologians, we will listen to the story of Creation, talk about it and retell the story. We will learn how we can recognise God's presence when we can't see him. We will also learn about our responsibility for taking care of the world and its people. We will be reflecting on the words of the Our Father and different ways to pray.

Year 1

Autumn 1 Term 2026

Family Album

Science

As scientists, we are looking at the Human Body and our senses this half term. We will be identifying the different parts of the body and what they are used for, and we will even explore what is inside our bodies! We will discover what senses are and which part of the body they link with.

History

As historians, we will be considering changes that have happened within memory – so how we have changed since we were born and how family members have changed. We will also discover other events in living memory that people can remember. For example, what birthdays and schools used to be like.

Curriculum Enrichment

Trip to the Judges Lodging

Visits from Father John

PSHE

As caring community members, we will play games to help us recognise how we play with and alongside others, talk about how friendships are made and what we could do when we fall out with our friends. We will share examples of kind behaviour and talk about what we can do if we see unkind behaviour.

Computing

As computer scientists, we will be exploring Purple Mash and become familiar with how to; login, navigate, save and find work, search for resources and view teachers comments. Our Purple Mash usernames and passwords can be used at home and school.

PE

As athletes, we are going to practice our fundamental skills, such as the egg roll and jumping, and we will also be practising moving our body in dance.

Art

As artists, we will be taking photographs of ourselves and using these images to create our own portraits using Picasso as our inspiration. We will begin to express our opinion about our own and others art work.
