Half-termly Creative Independent Homework

Unlocking potential together
in faith and love.

Design your own unique creature!

Your task is to develop your very own animal – complete with its own individual characteristics.

- You could make a 3D model using textiles and fabric or junk model it from recycled material.
- You could sculpt it in clay or plasticine.
- You could make a nature documentary all about it! A cartoon animation! A stop-motion animation.
- You could create an interactive poster or write a detailed information booklet!

Your presented work should be ready for **Monday 3rd November 2025** and will be shown in a special exhibition with all your classmates work.

Think carefully about how and why your new creature has changed and adapted to its environment – your work should be detailed, carefully presented, of a high standard and show off your wonderful imagination and talents. You will produce a hand-written report detailing just how your crazy created creature has adapted to be a brilliant beautiful beast!

Here are some ideas to get you started!
