

## Classcharts Analytics

Classcharts analytics can be used to generate reports to check for submissions – sometimes this is easier than clicking through each group's homework tab. Use the **ANALYTICS** tab at the top of Classcharts.

Set it up as follows, adding whichever groups you want to check:

- Set date range
- Primary breakdown - Teacher
- Secondary breakdown - leave blank
- Then filter by teacher and filter by lesson (these look greyed out, but they are actually usable!) and select your groups
- Hit the generate button

The screenshot shows the ClassCharts Analytics interface. The top navigation bar includes 'CLASSES', 'ACTIVITY', 'PUPILS', 'ANALYTICS', and 'HOMEWORK CALENDAR'. The left sidebar lists various analytics categories, with 'HOMEWORK' selected. The main content area is titled 'Generate a homework submissions report' and contains the following fields:

- Date range:** A date picker showing '16/3/2020 - 27/3/2020'.
- Date type:** Radio buttons for 'Issue date' (selected) and 'Due date'.
- Primary breakdown:** A dropdown menu set to 'Teacher'.
- Secondary breakdown:** A dropdown menu set to '-- choose breakdown --'.
- Filter by teacher:** A checkbox that is checked, with a list of teachers including 'Mr Thomas Rubery'.
- Filter by lesson:** A checkbox that is checked, with a list of lessons including '10C1/It'.

I hope this helps!

As always, I'm happy to give 1-to-1 demos, and answer questions if you have any!
