<p><u>SP2</u>: Look at the titanic - why did it sink? (link to science)</p>	<p>People in the past would travel abroad on ships not aeroplanes like today. The ships took so long to reach a destination that they had everything on board e.g. rooms, hairdressers, libraries, restaurants etc. The Titanic was travelling from England to America, over 100 years ago! Before the disaster people thought the Titanic would never sink. There were different places to live and socialise depending on the amount of money you had (1st, 2nd and 3rd class) One night the ship hit an iceberg and it made a huge hole in the Titanic causing it to fill with water. It then sank to the bottom of the ocean.</p>	<p>titanic a long time ago history same/different change people lives past/nor old/new questioning finding out order (event) ship England America travel abroad disaster sink 1st/2nd/3rd class iceberg ocean</p>
