

SMSC in English at Chapel Ford Village Primary School

Spiritual development

Spiritual development in English involves children exploring the meanings of different books and texts and empathising with characters facing problems within their lives. The children often complete drama activities or act in role to encourage empathy with the characters. The novels and texts that pupils study have been carefully selected so that students not only engage with the ideas but the emotional journey of the characters involved. There is the opportunity for the children to reflect on their personal lives through text types such as diaries and biographies, and to enhance their emotional understanding through the widening of their vocabulary. For example, during their reading of *Wonder*, year 6 have thought about and discussed the relationships, friendships and responses of the different characters.

Moral development

Moral development involves children analysing the dilemmas many characters face in the books and texts as well as searching for hidden messages or acquiring an understanding of the difference between right and wrong. In the younger year groups, we aim to teach and recognise morals such as the way we treat others by reading a range of books and understanding the message they are trying to teach us. For example, year 1 look at friendships when reading the text, *Lost and Found*. In the older year groups, we aim to teach and recognise more complex moral dilemmas and ways to overcome or deal with them. We achieve this by giving them the opportunity to explore the motives of particular characters and certain issues both verbally and in their writing.

Social development

Social development in English involves pupils developing their ability to learn as a team, valuing active listening and taking on a responsibility within a group. We read novels and short stories that offer perspectives on society and the community and how it impacts their lives. Whilst participating in group discussions, pupils are introduced to ways of communicating fairly and effectively with each other. This also develops their confidence and knowledge of language, which is an important aspect of individual and social identity. We enable children to understand and engage with the feelings and values embodied within poetry, fiction, drama, film and television. Our use of a variety of sources helps children to understand how language has change over time. For example, when year 5 read several versions of Greek myths, they compare the differences in language between old and new versions.

Cultural development

Cultural development involves engaging with texts from other cultures in order to expand pupils' exposure and awareness of other backgrounds. Through imaginative writing, poetry, imagery, drama, role play, myth and

historical narrative, the children explore the viewpoints and attitudes of those from other cultures as well as their own. Pupils are given the opportunity to compare their own culture and community with ones that are different. For example, throughout multi cultural week, KS2 classes research about Ethiopia to produce a range of writing. The children focus upon the geography, culture, climate, food and other key information. Pupils are also encouraged to have a cultural awareness through theatre trips and the exploration of other media.
