Maximilian's Homework

Roman Numeral	Number
I	**1**
V	**5**
X	**10**
L	**50**
C	**100**
D	**500**
M	**1000**

Please accept any answer that recognises the two rules used when forming numbers using Roman numerals:

1. If a larger number symbol is followed by a smaller one, you add the two together. You also add if two symbols are the same.
   XI = 10 + 1 = 11
   XX = 10 + 10 = 20

2. If a smaller number symbol is followed by a larger number symbol you must subtract the small number from the large one.
   IX = 10 – 1 = 9
   IV = 5 – 1 = 4
