

# Maths Mastery Home Learning Challenge

## Adult Guidance

### What Are We Learning?

To place objects in height order and describe them.

### How to Set up the Challenge

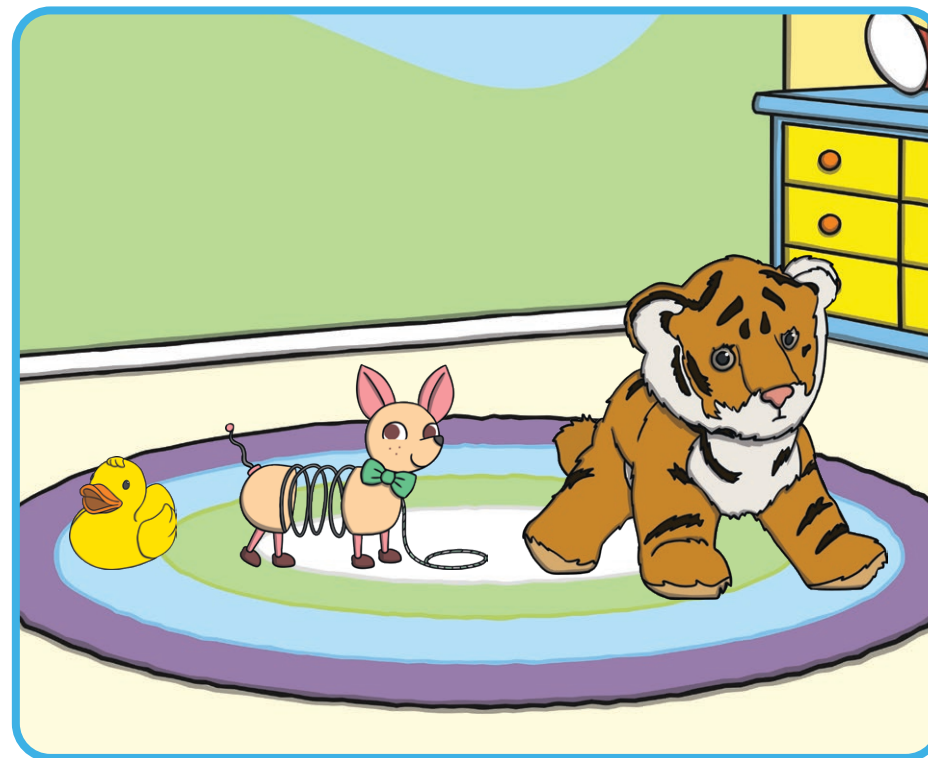

- Ask your child to find their favourite toy.
- Encourage your child to explore the language of height and make direct comparisons by asking them to find a toy that is taller.
- Then, encourage them to find a toy that is shorter than their favourite toy.
- Ask your child to place the toys in order of height.
- Encourage your child to talk about the order and say which toy is tallest and which is shortest.

### How to Get Your Child Thinking

- Can you find a toy that is taller than your favourite toy?
- How can you be sure that it is taller? How can you check?
- Can you find a toy that is shorter than your favourite toy?
- Are you sure it is shorter? Can you show me?
- Can you put your toys in order? How can you do this?
- Can you describe them? Which is the tallest and which is the shortest?
- Can you think of something that is taller/shorter than you?

## How Tall Is Your Toy?

- Find your favourite toy.
- Can you find a toy that is taller?
- Can you find a toy that is shorter?
- Can you put the toys in order?
