

MATHS

In Maths we will be looking at statistics; reading, creating and interpreting graphs and tables. We will also be learning about squared, cubed and prime numbers as well as the relationship between multiples and factors. We will also begin a national competition called Wonder Maths which tests our problems solving, mental arithmetic and code breaking skills!

SCIENCE

In Science we will be investigating properties of materials, including experiments around solubility, classification and separation.

ART

In Art we will be working with clay; learning about its properties and making an Egyptian death mask.

ENGLISH

In English we will be creating non-chronological reports centered around our topic. Researching all aspects of Ancient Egyptian life, we will then use skills to bring the information together into a cohesive and engaging piece. We will then finally move onto building skills in persuasive writing to create a travel brochure to Egypt.

ANCIENT EGYPT

TOPIC

Our topic this term will be Ancient Egyptians. We will investigate and research many aspects of life as an ancient Egyptian such as the Nile, Pyramids and mummification. Our learning culminating in creating a flip flap book!

PE

Football and handball is our focus for this term's PE lessons.
