

Chisenhale's edible Playground

Our First Year

September 2010- July 2011

After our initial set up, the garden was a blank canvas ready for us to start growing our own food. We wanted the Edible Playground to become part of the curriculum and to help enhance learning for pupils.

One of the first things we planted were wheat seeds for our lesson in loaf, later in the year.

Pupils sowed and nurtured their seeds. We grew a lot of pumpkins which were carved and also used in lessons.

We harvested our first produce to give to Nigel the school chef.

Family after-school gardening club

We exhibited our Alice in Wonderland scarecrow at Hampton Court Flower Show.

We compost the vegetable peelings from the school kitchen and have a wormery too.

Pupils planted trees in Victoria Park

We sold our produce at the Christmas and summer fetes.
