

In Art IALT: create a Viking Helmet.

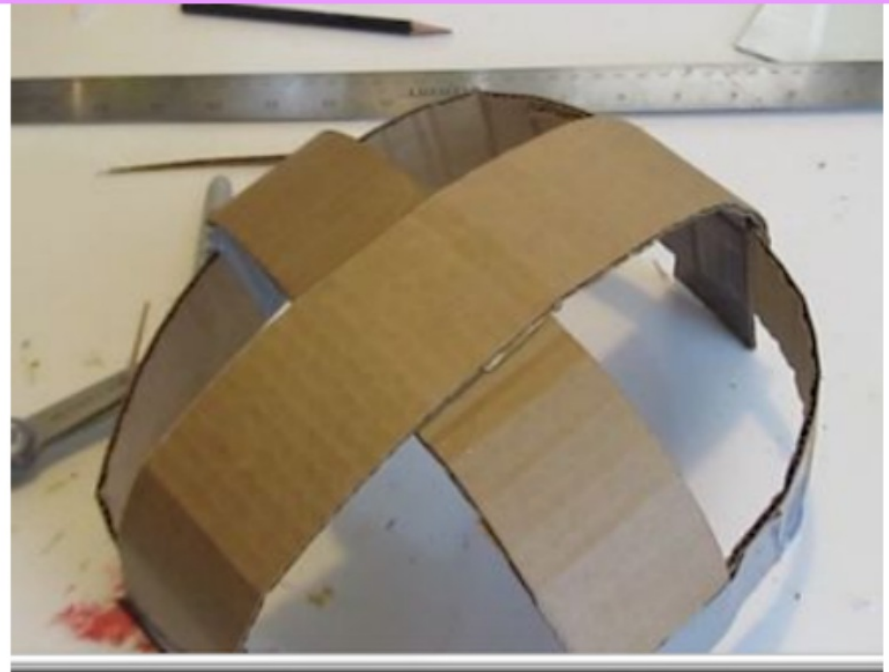

You can use the following steps to create your own Viking helmet OR you may want to design and make your own :)

Step 1:

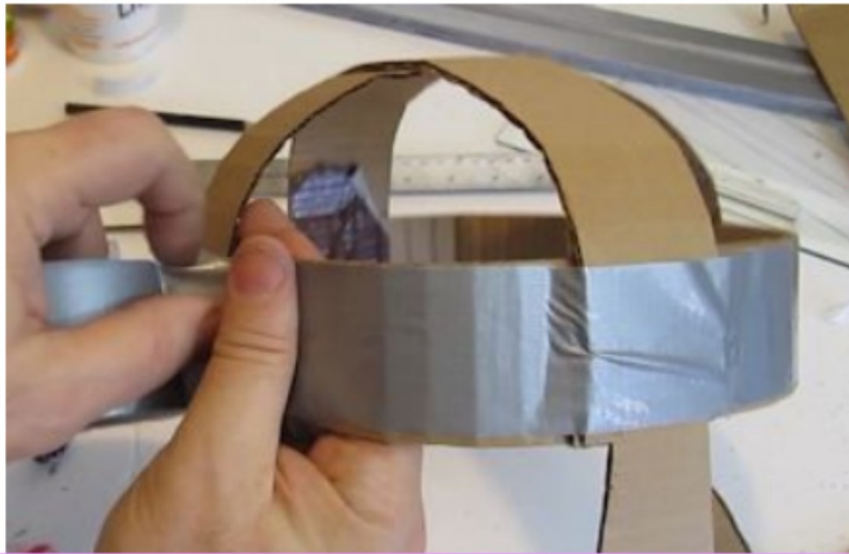

Cut a strip of cardboard that is two inches wide and shape it into a ring that can comfortably fit around your head like a head band.

Step 2:

Then cut two more strips of cardboard that are two inches wide and attach them to that headband so they form a x across the top like this. Now you have a bowl that will fit on your head.

Step 3:

And notice how one of those strips is longer. This forms the nose piece.

And if you have duct tape now wrap the whole helmet with it.

Step 4:

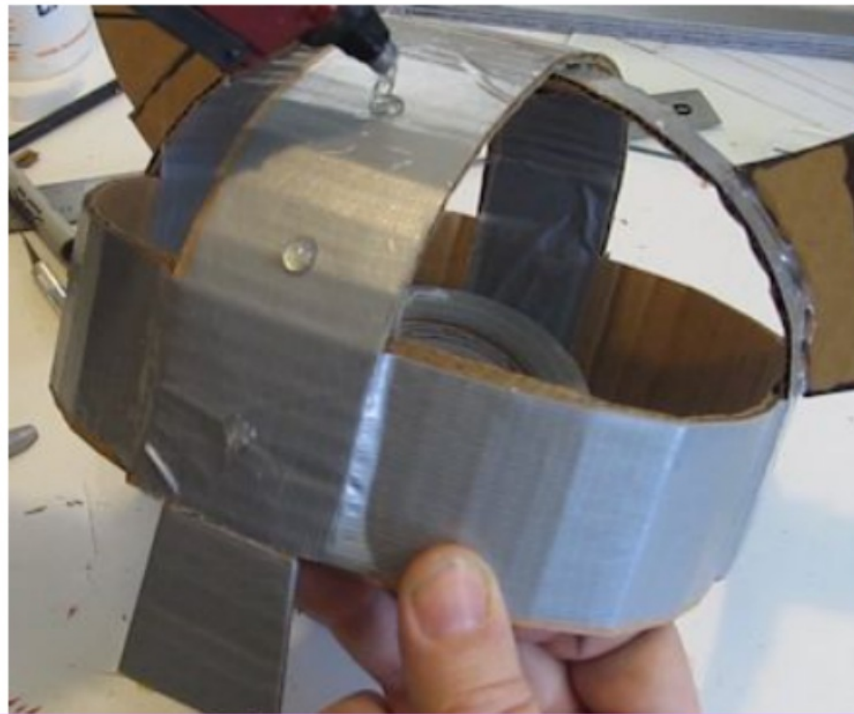

Next draw out a pair of horns. Then cut them out.

Step 5:

And glue those horns to the sides of the helmet. I recommend you cut away some of the duct tape so the glued horn will stick to the cardboard underneath. This will hold better.

Step 6:

Add some rivets. I used hot glue. You can also cut out pieces of foam or other material and glue them on if you don't have a glue gun.

Step 7:

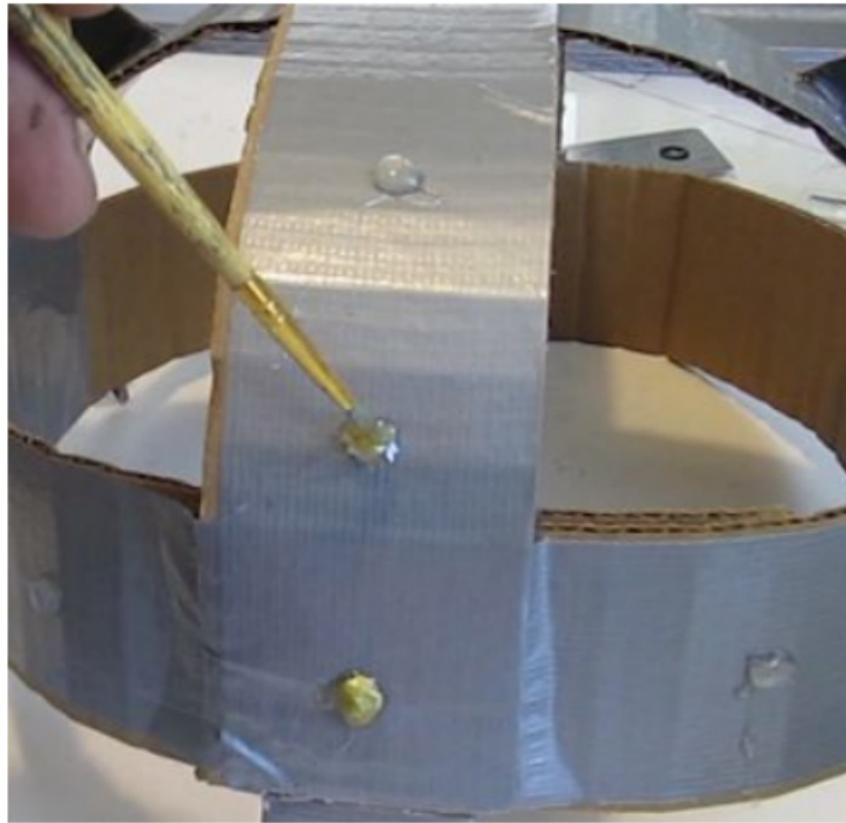

Paint the horns black at the base and the horns themselves white.

Step 8:

Add some brown to the horns to make them look like horn.

Step 9:

Finish off the helmet by painting the rivets.

And that's it! Your Viking Helmet is complete.

Send pictures of your helmets to your teachers and
we might put them on the website!
