Well done! You have run $\frac{2}{4}$ of the way!

Mr Lopez

Lee

I have run $\frac{1}{2}$ of the track!

Who is correct Lee or Mr Lopez?

Cuisenaire Rods

*Have you used them before?
What did you use them for?
How were they useful?*

We are going to use these symbols to help us understand fractions

Find the equivalent to $\frac{1}{2}$ of the pink rod.

What fraction would it be? How can you prove it?
Is there more than one answer?

Reena

$$\frac{\boxed{1}}{\boxed{2}} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{\boxed{1}}{\boxed{3}} = \frac{\boxed{}}{\boxed{}}$$

Danny

- $\boxed{3}$
- $\boxed{4}$
- $\boxed{5}$
- $\boxed{6}$

- $\boxed{2}$
- $\boxed{4}$
- $\boxed{5}$
- $\boxed{6}$

What fraction is shaded?

$$\frac{\square}{\square} = \frac{\square}{\square}$$

What do you notice about the numerator and denominator?

What fraction is shaded?

$\frac{2}{4}$

=

$\frac{4}{8}$

$$\frac{\boxed{2}}{\boxed{4}} = \frac{\boxed{4}}{\boxed{8}}$$

What do you notice about the numerator and denominator?

What fraction is shaded?

$$\frac{\square}{\square} = \frac{\square}{\square}$$

What has changed to the numerator?

What has changed to the denominator?

$\frac{1}{10}$

What fraction is shaded?

$\frac{3}{30}$

What has changed to the numerator?

What has changed to the denominator?

$\frac{1}{4}$

Identify the fractions
equivalent to $\frac{1}{4}$

What has changed to the numerator? What has changed to the denominator?

$$\frac{1}{4} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{1}{4} = \frac{\boxed{}}{\boxed{}}$$

$$\frac{1}{4} = \frac{\boxed{}}{\boxed{}}$$

$\frac{1}{4}$

$\frac{2}{8}$

$\frac{3}{12}$

$\frac{4}{16}$

Identify the fractions
equivalent to $\frac{1}{4}$

What has changed to the numerator? What has changed to the denominator?

$$\frac{1}{4} = \frac{2}{8}$$

Diagram illustrating the multiplication of the fraction $\frac{1}{4}$ by 2 to get $\frac{2}{8}$. A purple box labeled 'x2' is above the fraction, and another purple box labeled 'x2' is below the fraction, with arrows indicating the multiplication of both the numerator and denominator by 2.

$$\frac{1}{4} = \frac{3}{12}$$

Diagram illustrating the multiplication of the fraction $\frac{1}{4}$ by 3 to get $\frac{3}{12}$. A purple box labeled 'x3' is above the fraction, and another purple box labeled 'x3' is below the fraction, with arrows indicating the multiplication of both the numerator and denominator by 3.

$$\frac{1}{4} = \frac{4}{16}$$

Diagram illustrating the multiplication of the fraction $\frac{1}{4}$ by 4 to get $\frac{4}{16}$. A purple box labeled 'x4' is above the fraction, and another purple box labeled 'x4' is below the fraction, with arrows indicating the multiplication of both the numerator and denominator by 4.

Book Presentation

Draw a line down the centre of your book

$$\begin{array}{r} 1 \\ \hline 2 \end{array} = \begin{array}{r} 2 \\ \hline 4 \end{array}$$

$\times 2$ (top arc) $\times 2$ (bottom arc)

← Leave a line

$$\begin{array}{r} 5 \\ \hline 10 \end{array} = \begin{array}{r} 1 \\ \hline 2 \end{array}$$

$\times 5$ (top arc) $\times 5$ (bottom arc)

← Leave a line

Tasks:

Mild:

Fold your paper into 3 equal parts. Colour in $\frac{1}{3}$ of your paper.

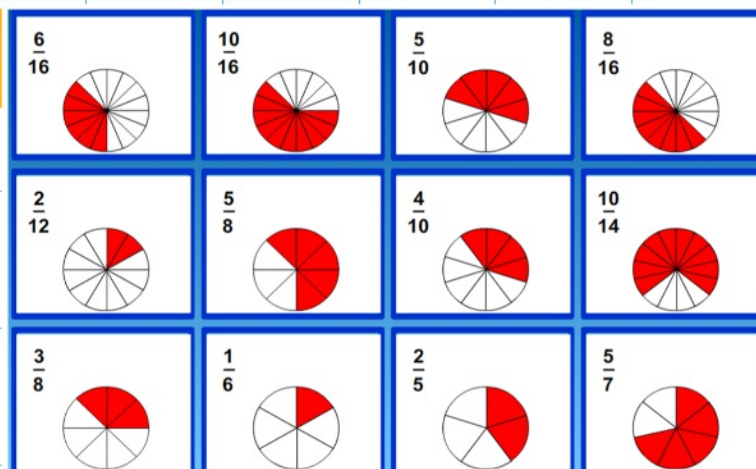

$$\frac{\square}{3} = \frac{\square}{6}$$

Now fold it in half. How many equal parts do you have now? How many parts are shaded? How would we write this as a fraction? What do you notice?

Fold the paper strip into 5 equal parts shade in one part. What is the fraction? Fold your paper in half. How many equal parts do you have? How many are shaded? What is the fraction? Write an equivalent fraction for this?

$$\frac{\square}{\square} = \frac{\square}{\square}$$

Spicy:

HHH:

Order these fractions from smallest to largest:

$$\frac{3}{4} \quad \frac{3}{5} \quad \frac{9}{10} \quad \frac{17}{20}$$

Choose one of the following symbols to make the number sentences correct:

<, > or =

$$\frac{1}{3}$$

$$\frac{2}{5}$$

$$\frac{3}{7}$$

$$\frac{1}{3}$$

$$\frac{2}{3}$$

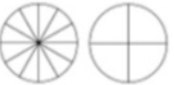

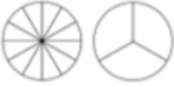

$$\frac{6}{9}$$

Find matching pairs

Explain how your times tables helps you find equivalent fractions

Mild:

Complete the table. Can you spot any patterns?

Pictorial representation	Fraction	Words
	$\frac{6}{8} = \frac{3}{4}$	Six eighths is equivalent to three quarters
	$\frac{1}{3} = \frac{\square}{9}$	_____ is equivalent to _____
	$\frac{\square}{4} = \frac{\square}{12}$	Three twelfths is equivalent to _____ quarters
	$\frac{4}{12} = \frac{\square}{\square}$	_____ is equivalent to _____

Spicy:

Always, sometimes, never.

If a fraction is equivalent to one half, the denominator is double the numerator.

Prove it.

Can you find any relationships between the numerator and denominator for other equivalent fractions?

Tasks:

Mild:

ANSWERS:

Fold your paper into 3 equal parts. Colour in $\frac{1}{3}$ of your paper.

Now fold it in half. How many equal parts do you have now? How many parts are shaded? How would we write this as a fraction? What do you notice?

Fold the paper strip into 5 equal parts shade in one part. What is the fraction? Fold your paper in half. How many equal parts do you have? How many are shaded? What is the fraction? Write an equivalent fraction for this?

$$\frac{1}{3} = \frac{2}{6}$$

$$\frac{1}{5} = \frac{2}{10}$$

Spicy:

HHH:

Order these fractions from smallest to largest:

$$\frac{3}{4}$$

$$\frac{3}{5}$$

$$\frac{9}{10}$$

$$\frac{17}{20}$$

$\frac{3}{5}, \frac{3}{4}, \frac{17}{20}, \frac{9}{10}$

Choose one of the following symbols to make the number sentences correct:

<, > or =

$$\frac{1}{3}$$

$$\frac{2}{5}$$

$$\frac{3}{7}$$

$$\frac{1}{3}$$
