

Friday 17th January 2020

An evening of Calculation: how your child is taught to calculate at Corpus Christi

Dear Parents/ Carers,

On **Monday 16th March 2020 from 7-8pm** we are hosting a Maths Evening to show all parents and carers how we, at Corpus Christi, teach **Calculation** (addition, subtraction, multiplication and division) across the school, from Nursery to Year 6.

The evening will include:

- a short overview of the progression of calculation throughout the school, including particular resources and vocabulary that are used;
- an opportunity to see the main concrete materials that are used to support understanding as well as some examples of questions that the children complete in lessons;
- time to ask teachers specific questions about how calculation is taught in your child's year group; and
- a summary session to re-emphasise some key points for you to take away and to show you where you can find further resources.

We hope this will be a fantastic evening that will give you the tools and understanding to support your child's / children's understanding of calculation at home.

If you are unable to attend, there will be some resources available on the school website after the evening. There will be more information about this nearer the time.

Thank you for your continuing support,

Mrs Giles

Maths Coordinator
