

Vision and Principles for Science

We conduct investigations as part of every science topic

We ask questions and are inspired to find out more

We make connections to our real world experiences

We are active in science lessons

We go back over prior learning and make links to science in other subjects

At Corpus Christi, we aim to nurture, motivate and inspire all children to become scientists. We want them to develop a sense of excitement and curiosity about the world around them.

We promote and celebrate science in displays and online

Lessons are enriched with visitors, trips, outdoor learning experiences and good resources

We use science vocabulary in our scientific explanations

Everyone is included and valued in lessons

We learn about scientists and what they do
