

Chiefs governors report 2022

This term, Chiefs have been working hard in all aspects of learning and are very proud to show you what they have achieved. We have covered a variety of topics and have certainly expanded our knowledge!

English

In English we have been focusing on fairy tales and have looked into different styles of fairy tales, from the traditional story of Little Red Riding Hood, to nonsense fairy tales such as The Gold Donkey. Chiefs have enjoyed reading them and have even written their own endings to a story!

After soaking up all our new knowledge we showed off our brainy skills by putting ourselves in the “hot seat”, by doing this we were able to choose a character and act them out, answering questions from our peers as they tried to guess who we could be- learning is always fun in Chiefs!

Maths

Maths has been one of our favourite subjects since September, we have some future accountants in the room! We have covered lots of different areas including time, multiplications and partitioning numbers in the 1000's. Staff have noticed a huge difference in some of the Chiefs learning which has been super positive, sometimes we can struggle when faced with daunting numbers but the attitude of Chiefs and confidence has excelled which is something everyone is proud of.

Topic

In Topic we have ditched the books and have been doing lots of practical learning- which is sometimes the best way to learn.

When the Queen unfortunately passed away, we wanted to do something in memory of her and also what she had achieved over the years of being Queen. We decided to create a stamp, including the Queen and also what she represented to us and the country. We looked into how the Queen became the Queen and her reign over the United Kingdom and what her very important role included.

After learning about Queen Elizabeth, we looked at planes, not any planes but the first ever plane built! Did you know, two brothers built the first ever plane? And after lots of tweaking it finally took flight for 5 seconds, which back then was incredible! This inspired Chiefs and got our brains working overtime, we created our own planes using different resources and materials and crossed our fingers it would fly. The sun was shining and the playground was our very own landing strip, we walked out ready to become pilots and pilots we became!

Thrive

Thrive is one lesson that everyone looks forward to! We have small groups and each work to create something spectacular. One group recently had to think of their hero, some of the children chose family members and others chose TV superhero's. They created a collage of pictures of their hero and could identify reasons as to why they chose them.

Other groups created their own country and also the rules that people should follow, and what consequences should be in place if those rules were not abided by. Thrive is a very hand on session and we love getting messy!

Forest School

Forest Schools has been very enjoyable this term, we have been making lots of practical things such as dens, broom sticks, magic potions and even our own pumpkins. When we aren't being hands on, we like to get into our favourite character, David Attenborough and sneak around the forest with our eyes peeled for different insects and animals. When we find some interesting creatures, we use our magnifying glasses to inspect them closer and also take a look at their habitats.

What we also enjoy is climbing trees! We understand that there are some rules we have to follow such as only climbing on branches that are thicker than our arms and climbing only to a certain height. We always follow these rules and understand that they are in place to keep us safe which is always our top priority!
